INTRODUCTION

Mental illness and substance use disorders impact our society and our daily lives. Nearly one million Missouri residents experienced a mental illness in the past year, and three-quarters of a million experienced a substance use disorder. Besides the federal response, Missouri state government agencies, county and municipal governments, school districts, and community groups commit substantial resources to address these disorders and their impacts. Data is a requisite tool for tracking, identifying, preventing, intervening, and treating mental and substance use disorders. With the cooperation of our state agencies and other sources, the Annual Status Report has been compiling behavioral "What, When, and Where" data since the mid-1990s. Section A of this report acknowledges the individuals who contributed data for this 2023 edition; it also provides an overview of the report's main findings.

Section B quantifies the prevalence of mental illness and substance use disorders in Missouri and nationwide by providing percentage and population estimates from the annual National Survey on Drug Use and Health. Trend charts illustrate the increasing numbers of Missourians impacted. Section C presents incidence data from the biennial Missouri Student Survey and the annual Missouri Assessment of College Health Behaviors. The surveys clearly indicate that an increasing number of Missourians are facing mental health and substance use challenges.

Section D provides multi-year trends on a variety of analytics related to mental and substance use disorders, including medical, social, and criminal justice impacts. Section E unpacks this data into county and regional profiles to support data-driven needs assessment, prevention planning, and resource allocation.

The Division of Behavioral Health manages programs that provide treatment and support services to more than 100,000 Missouri residents annually. Section F of the report contains county and service area profiles quantifying the substance use disorder treatment services. Section G provides profiles for the mental health treatment services.

Section H includes maps illustrating the various geographic coverages of the data profiles.

The Missouri Behavioral Health Data archive houses most of the data from past editions of this Annual Status Report, as well as data from the Missouri Student Survey. To access this site, visit https://seow.dmh.mo.gov/.

Please direct inquiries, comments, and suggestions regarding this report and our other data products to DBHResearch@dmh.mo.gov.

SUMMARY OF THE SURVEY DATA

The federal government has been conducting the National Survey on Drug Use and Health, and its predecessor, the National Household Survey on Drug Abuse, annually since 1971. In 2002, the Substance Abuse and Mental Health Services Administration (SAMHSA) began producing state estimates of substance use measures along with the nationwide estimates. Later, SAMHSA added some important mental health measures to the survey. The following are some of the key Missouri findings from the 2021 National Survey on Drug Use and Health:

- An estimated 2,403,000 Missouri residents, consisting of 46.4% of the Missouri population ages 12 and older, drank alcohol in the month prior to the survey. An estimated 1,447,000 (or 27.9%) used tobacco products in the past month. Marijuana was the most-used illicit drug, with 742,000 (or 14.3%) using it in the past month. An estimated 151,000 (or 2.9%) used an illicit drug other than marijuana in the past month.
- Also among Missouri residents ages 12 and older, 963,000 (or 18.6%) used marijuana in the past year, including 65,000 (or 2.6%) who used it for the first time. Among residents ages 12 and older, 87,000 (or 1.7%) used cocaine and 60,000 (or 1.2%) used meth. Among residents ages 18 and older, an estimated 25,000 used heroin. Opioids were misused by 188,000 (or 3.6%) of residents ages 12 and older, and 176,000 (or 3.4%) misused prescription pain relievers in the past year.
- In 2021, an estimated 904,000 Missouri residents (or 17.5% of the population ages 12 and older) had a substance use disorder. They included 527,000 (or 10.2%) with an alcohol use disorder and 503,000 (or 9.7%) with a drug use disorder. This latter group included 103,000 (or 2.0%) with an opioid use disorder and 92,000 (or 1.8%) with a prescription pain reliever use disorder.
- Among the Missouri residents with a substance use disorder (SUD), an estimated 803,000 (or 15.5%) indicated that they were unable to receive specialty SUD treatment or needed additional treatment. They included 505,000 (9.7%) with unmet or under-met need for alcohol use disorder (AUD) treatment and 392,000 (7.6%) for drug use disorder (DUD) treatment.
- An estimated 1,149,000 Missouri residents (or 24.5% of the adult population ages 18 and older) had some degree of mental illness in 2021. Among these, 284,000 (or 6.1%) had a serious mental illness.
- Also among Missouri adults, 238,000 (or 5.1%) had serious thoughts of suicide in the past year. They included 63,000 (1.3%) who made a suicide plan and 35,000 (0.7%) who attempted suicide.

- In 2021, 109,000 Missouri adolescents ages 12-17 (or 22.4%) and 284,000 adults (or 9.4%) suffered a major depressive episode.
- An estimated 922,000 Missouri adults (or 19.6%) received mental health services during the past year.

The Missouri Student Survey originated in the late 1990's with funding from the federal Drug Free Schools and Communities Act. It surveys students in grades 6-12 and has been conducted biennially since 2000 by the Missouri Institute of Mental Health with support from the Missouri Department of Mental Health. In the 2022 survey, 35 schools and 1,678 students participated. The following are some key findings for grades 6-12 combined:

- Lifetime alcohol use increased from 35.3% in 2020 to 37.2% in 2022.
- Past month alcohol use decreased from 17.0% in 2020 to 14.9% in 2022.
- Past month riding with a drinking driver decreased from 17.0% in 2020 to 15.4% in 2022.
- Past month driving under the influence decreased from 2.02% in 2020 to 0.38% in 2022.
- Lifetime cigarette use decreased from 15.0% in 2020 to 10.7% in 2022.
- Past month cigarette use decreased from 4.5% in 2020 to 2.5% in 2022.
- Past month hookah use decreased from 1.9% in 2020 to 1.1% in 2022.
- Past month electronic cigarette use decreased from 15.5% in 2020 to 11.0% in 2022.
- Lifetime marijuana use decreased from 16.9% in 2020 to 15.3% in 2022.
- Past month marijuana use from decreased from 8.9% in 2020 to 4.5% in 2022.
- Lifetime hallucinogen use decreased from 2.2% in 2020 to 1.1% in 2022.
- Lifetime cocaine use decreased from 1.3% in 2020 to 0.3% in 2022.
- Lifetime meth use decreased from 0.7% in 2020 to 0.2% in 2022.
- Lifetime heroin use remained unchanged at 0.3% in 2022.
- Students who were victims of physical bullying increased from 19.0% in 2020 to 19.6% in 2022.
- Students who were victims of rumor-spreading decreased from 43.6% in 2020 to 42.7% in 2022.
- Students who were victims of emotional bullying remained virtually unchanged at 56.2% in 2022.
- Students who often or always felt irritable increased from 33.4% in 2020 to 35.5% in 2022.
- Students who often or always felt very sad increased from 25.2% in 2020 to 27.7% in 2022.
- Students who often or always felt hopeless remained unchanged at 15.5% in 2022.

- Students who seriously considered suicide remained virtually unchanged at 11.0% in 2022.
- Students who made suicide plans decreased from 8.6% in 2020 to 8.4% in 2022.
- Students who attempted suicide decreased from 4.9% in 2020 to 4.3% in 2022.
- Students who were injured in a suicide attempt remained unchanged at 0.8% in 2022.
- Students who had adults in their lives to turn to when feeling overwhelmed decreased from 76.3% in 2020 to 70.9% in 2022.
- Students who felt they could handle stress in a positive way decreased from 54.6% in 2020 to 52.8% in 2022.
- Students who felt optimistic about their futures remained unchanged at 74.1% in 2022.

The High School Youth Risk Behavior Survey (YRBS) from the Centers for Disease Control and Prevention provides a comparison of Missouri and U.S high school substance use and mental health rates. Several current (past 30-day) measures are highlighted below.

- In 2021, an estimated 24.3% of Missouri high school students and 22.7% of students nationwide drank alcohol at least once during the 30 days preceding the survey. Drinking rates progressed from 15.3% for 9th grade students to 36.8% for 12th grade. Overall rates were higher for females (27.5%) than males (21.7%). Similarly, U.S. females had higher drinking rates (26.8%) than U.S. males (18.8%).
- Estimated binge drinking rates were also higher for Missouri students (14.1%) than their U.S. counterparts (10.5%). Binge drinking progressed from 8.3% for Missouri 9th grade students to 21.8% for 12th grade. Rates were again higher for females (15.7%) than males (12.7%).
- Current use of electronic vapor products was slightly higher for Missouri high school students (19.3%) than U.S. students (18.0%), and rates were higher for Missouri females (21.3%) than males (17.6%). E-product rates were significantly higher for U.S. females (21.4%) than U.S. males (14.9%).
- Cigarette smoking rates were also higher for Missouri high school students (5.1%) than U.S. students (3.8%). Past 30-day cigarette use progressed from 1.6% for 9th grade students to 7.5% for 12th grade. Rates were higher for males (7.1%) than females (3.0%).
- In 2021, an estimated16.7% of Missouri high school students and 15.8% of U.S. students were current users of marijuana. Rates for Missouri females (18.0%) were higher than for males (15.4%). U.S. females also had higher rates of current marijuana use (17.8%) than U.S. males (13.6%).
- Nearly one-third (32.5%) of Missouri students reported debilitating feelings of sadness or hopelessness for a period of at least two weeks during the preceding year. These feelings affected more females (41.5%) than males (23.0%).

- An estimated one-fifth (20.4%) of Missouri high school students seriously considered attempting suicide during the year preceding the survey. The rate was significantly higher for females (25.5%) than males (15.2%). Rates for students who made actual suicide attempts during the year totaled 8.7%, and were higher for females (13.0%) than males (4.6%).
- In 2021, 15.4% of high school students reported being bullied on school property. Females reported being bullied at a higher rate (18.2%) than males (12.9%). Bullying rates regressed from 18.0% for 9th grade students to 12.3% for 12th grade.

The Missouri Assessment of College Health Behaviors (MACHB) and its predecessors, the Core Alcohol and Drug Survey and the Missouri College Health Behavior Survey, have surveyed Missouri college students annually since 2003. In recent years, the MACHB has been conducted at 24 Missouri colleges and universities. The 2023 survey had more than 5,800 respondents.

- The survey found that 63.6% of Missouri college students used alcohol during the past year and 52.8% during the past month. Nearly half of the past-month users engaged in binge drinking during the past two weeks. Binge drinking rates were 25% for males and 22% for females. The largest number of students identified hangovers (36.8%) and vomiting (28.1%) as adverse impacts of using alcohol.
- While 23.1% of students used tobacco products during the past year, only 9.6% used cigarettes. Vaping, at 19%, was the most common method for using tobacco.
- Marijuana/cannabis use during the past year increased from 27.2% in 2022 to 32.6% in 2023. Past-month use increased from 18.3% in 2022 to 22.9% in 2023. The largest number of students identified feeling morning-after “fog, sluggish, tired, or dazed” (40.2%) and increased tolerance (25.5%) as adverse impacts of using marijuana.
- Hallucinogens such as MDMA (ecstasy), mushrooms, LSD, and PCP were used by 5.7% of Missouri college students during the past year.
- Mental health issues experienced by many students during the past year included anxiety (67.2%), depression (53.8%), panic attacks (30.1%), sleep disorders (26.2%), suicidal thoughts (25.9%) eating disorders (23.8%), and substance use disorders (4.7%). Over 80% of the students who identified each of these issues sought assistance for them.

The Missouri Pregnancy Risk Assessment Monitoring System, or PRAMS, is a surveillance project jointly conducted by the Centers for Disease Control and Prevention (CDC) and the Missouri Department of Health and Senior Services. The following are some key findings from the 2021 PRAMS survey.

- Although 63.2% of mothers of Missouri newborns reported alcohol use during the three months before pregnancy, only 7.1% reported alcohol use during the last three months of pregnancy.
- While 16.4% of mothers reported smoking prior to their pregnancies, only 8.7% smoked during the last three months of pregnancy.
- The percentage of mothers who reported regular use of prescription pain relievers decreased from 25.6% before pregnancy to 3.4% during pregnancy. However, 72.6% reported use of over-the-counter pain relievers during pregnancy.
- Marijuana use during pregnancy was reported by 6.2% of mothers of newborns.
- During pregnancy, 20% of mothers reported depression and 40.2% reported using prescription medication for depression.
- During prenatal visits, 95.9% of prospective mothers were asked by healthcare professionals if they smoked cigarettes, 96.1% were asked if they drank alcohol, and 83.8% were asked if they used illicit or prescription drugs.

The Behavioral Risk Factor Surveillance System, also jointly conducted by the CDC and Missouri Department of Health and Senior Services, surveys Missouri adults 18 years of age and older. Among key findings from the 2022 survey are the following:

- An estimated 57.3% of adult males and 47.8% of adult females currently drink alcohol, and 23.5% of males and 14.4% of females are binge drinkers.
- Tobacco smoking rates continue to decline. Currently 16.8% of Missouri adults smoke, compared to 23.9% ten years ago. The percentage of males who smoke (17.3%) is slightly higher than the percentage of females (16.2%).
- More adults are reporting that they have serious difficulty concentrating, remembering, or making decisions. The percentage reporting this condition reached a new high of 13.4% of U.S. adults and 15.7% of Missouri adults. Missouri females had a higher rate than males—17.5% compared to 13.7%.
- At 21.8%, Missouri and U.S. adults are equally impacted by depression. An estimated 28.5% of Missouri females and 14.6% of males at some time in their lives have been clinically diagnosed with depression by a doctor, nurse, or other health professional.

Monitoring the Future is a project begun in 1975 by the University of Michigan Survey Research Center, through funding provided by the National Institute on Drug Abuse. The purpose of the project is to study changes in the beliefs, attitudes, and behavior of U.S. youth. Approximately 50,000 students nationwide in grades 8, 10, and 12 from 420 public and private secondary schools are surveyed annually. Additional surveys have been developed for college students, young adults aged 19-30, and older adults aged 35-50. This *Status Report* provides substance use trend tables for each of these groups.

BEHAVIORAL HEALTH INDICATORS DATA SUMMARY

Missouri state agencies annually prepare and provide data for presentation in the annual Status Report. The data, which agencies collect from sources throughout Missouri, serve as some of the key indicators of substance use disorders and mental illness. While this summary presents statewide totals, most of the data are included in the county and region profiles in Section E of this Status Report. Some notable recent trends include the following:

- Missouri recorded 71,776 resident deaths in calendar year 2022. These included 1,214 suicides and 740 homicides. Nearly 14% (9,955) of Missouri's deaths were attributable to smoking. Also, there were 2,251 drug induced deaths and 910 alcohol induced deaths. Total deaths in these categories increased by almost 1% from 2021.
- There were 23,785 emergency room episodes by Missouri residents mainly due to alcohol use disorders in 2021, and 9,900 hospital admissions. Compared to 2020, there was a slight decrease in hospital services for alcohol use disorders.
- In 2021, emergency room episodes for drug use disorders totaled 18,134, and there were 6,072 hospitalizations. Emergency room services for drug use decreased 6% from the previous year.
- Also in 2021, Missouri residents had 83,252 emergency room episodes and 64,149 hospital admissions mainly related to mental disorders. Compared to 2020, E.R. episodes for mental disorders increased 1% and hospitalizations decreased 2%.
- Missouri recorded 138,405 traffic crashes in 2022. Alcohol impaired drivers comprised 3.6% (5,012) of these crashes, resulting in 145 deaths and 2,620 injuries. Crashes involving alcohol impaired drivers were nearly 7% lower than in year 2021.
- In 2022, there were 212 traffic crashes involving alcohol impaired pedestrians and 26 involving drug impaired pedestrians.
- Drug impaired drivers accounted for nearly 0.8% (1,046) of Missouri traffic crashes in 2022. These crashes resulted in 56 deaths and 623 injuries. Crashes involving drug impaired drivers decreased by nearly one-third (32%) from 2021 to 2022.
- In 2022, 20,987 individuals were arrested in Missouri for driving under the influence of alcohol or drugs. This was a slight increase from year 2021.

- Missouri had 31,998 drug arrests in 2022. This was a 22% increase from the 26,226 drug arrests recorded in 2021. Nearly 10% of the drug arrests involved drug sales or manufacturing.
- In fiscal year 2023, 3,518 drug offenders entered Missouri prisons, and 5,998 were placed on probation. The number incarcerated for drug offenses was nearly 15% lower than the 6,599 in fiscal year 2022. The number of drug offenders placed on probation decreased about 9% from fiscal year 2022.
- As an alternative to other types of adjudication, 6,380 Missouri residents participated in treatment court programs in fiscal year 2023.
- Domestic violence reports totaled 36,053 in 2022, a 3% decrease from 2021.
- In 2022, Missouri's juvenile courts handled 12,554 cases of child abuse, neglect, and custody issues. While there was a 14% decrease in neglect cases compared to 2021, there was a 7.7% increase in abuse and 4.6% increase in custody cases.
- The courts also handled 20,315 juvenile law violations in 2022, a substantial increase of 62% from 2021. Included were 5,662 violent offenses (28% increase), 514 alcohol violations (83% increase), and drug offenses (68% increase).
- Total juvenile status offenses increased 19% in 2022. There were 4,975 cases involving injurious behavior, a 34% increase. Referrals for school truancy increased 20% to 3,039, and there were 1,680 involving children beyond their parents' control.
- School districts report discipline incidents in which students are removed from the classroom for 10 or more consecutive days. There were 15,586 reported incidents in the 2022-2023 school year compared to 13,706 in the previous school year. There were 3,957 reported substance-related suspensions and 1,288 involving violence or weapons. Actual suspensions are greater than those reported, due to required district-level data suppression of fewer than five incidents.
- Out-of-home placements of children totaled 6,067 in 2022, a 10% reduction from 2021. Parental substance use was cited as a factor in more than one-half (3,197) of the investigations leading to removals and alternative placements.

SUBSTANCE USE DISORDER TREATMENT SUMMARY

Nearly 38,000 Missouri residents were admitted to substance use disorder treatment services from the Missouri Division of Behavioral Health in fiscal year 2022. The following quantifies the primary drug issues each identified:

- 30.9% (10,048) for opioid use (heroin, fentanyl, and prescription opioids)
- 27.9% (10,590) for stimulant use (meth and cocaine)
- 26.5% (10,082) for alcohol use
- 12.7% (4,810) for marijuana use
- 2.0% (763) for other drugs and substances.

Many had confounding issues:

- 62.5% of the adults were unemployed or not in the workforce
- 56.6% (21,492) had a co-occurring mental disorder
- 28.0% (10,625) were using drugs daily
- 26.5% (10,065) did not finish high school
- 21.3% (8,084) were injecting drugs
- 17.8% (6,749) were recently arrested for a substance related traffic offense
- 10.1% (3,845) needed a special education program
- 9.2% (3,513) were homeless or unsheltered
- 1.9% (737) were pregnant
- 1.8% (684) had past or current military service
- 1.7% (634) were hearing impaired
- 1.1% (435) had a co-occurring developmental disability
- 0.9% (353) were incarcerated

How they contacted treatment:

- 43.0% (16,351) were self-referrals; 31.0% (11,773) were criminal justice referrals; 10.1% (3,829) were referred by a health or mental health agency; 3.1% (1,170) were referred by a family member or friend; 0.4% (140) were referred by a school; and 12.5% (4,732) had other referral source sources.

Demographic characteristics:

- 59.3% (22,524) were male and 40.7% (15,454) were female.
- 77.1% (29,303) were white; 16.8% (6,393) were black; 0.2% (94) were Native American; 0.2% (91) were Asian; 1.5% (563) were some other race; and 4.1% (1,551) were two or more races.
- 4.0% (1,501) were under 18 years of age; 9.9% (3,757) were 18-25; 33.6% (12,773) were 26-35; 28.4% (10,801) were 36-45; 14.6% (5,542) were 46-55; and 9.5% (3,621) were over age 55.

MENTAL HEALTH TREATMENT SUMMARY

More than 75,000 Missouri residents received mental health treatment from the Missouri Division of Behavioral Health in fiscal year 2022. Some had more than one disorder, resulting in more than 146,000 total diagnoses:

- 48.7% (36,611) had depression.
- 34.9% (26,255) had anxiety or fear disorders.
- 31.0% (23,340) had trauma or stress disorders.
- 19.7% (14,813) had bipolar disorders.
- 18.7% (14,082) had schizophrenia or other psychotic disorders.
- 17.6% (13,271) had attention deficit disorders.
- 10.5% (7,938) had impulse control or other conduct disorders.
- 8.6% (6,463) had obsessive-compulsive or other personality disorders.
- 1.5% (1,128) had eating or sleeping disorders.
- 0.7% (560) had sexual disorders.
- 2.7% (2,006) had other or unknown disorders.

Many had additional confounding issues:

- 39.6% (29,799) had co-occurring substance use disorders
- 31.2% (23,454) did not finish high school
- 30.6% (23,053) of the adults were unemployed or not in the workforce, among those with known employment status
- 7.9% (5,970) had co-occurring developmental disabilities
- 3.3% (2,488) were homeless or unsheltered
- 2.3% (1,736) were hearing impaired
- 1.5% (1,143) had past or current military service
- 0.9% (705) were incarcerated

How they contacted treatment:

- 37.9% (28,551) were self-referrals; 15.7% (11,821) were referred by a family member or friend; 14.3% (10,776) were referred by a health care provider; 9.0% (6,804) were referred by a mental health provider; 6.3% (4,727) were referred by a school; 3.5% (2,649) were criminal justice referrals; and 13.2% (9,914) had other referral sources.

Demographic characteristics:

- 47.9% (36,027) were male and 52.1% (39,211) were female
- 69.4% (52,237) were white; 21.9% (16,473) were black; 0.4% (269) were Asian; 0.2% (165) were Native American; and 8.1% (6,107) were another or more than one race.
- 13.0% (9,787) were under age 12; 16.2% (12,184) were 12-17; 9.3% (6,995) were 18-25; 14.8% (11,155) were 26-35; 14.9% (11,229) were 36-45; 14.2% (10,672) were 46-55; 13.6% (10,212) were 56-65; and 4.0% (3,017) were over age 65.

Data Source: U.S. Department of Health and Human Services, SAMHSA. National Survey on Drug Use and Health.
Estimates are 2-year averages except for 2021. Binge Alcohol Use is defined by SAMHSA as drinking five or more drinks (for males) or four or more drinks (for females) on the same occasion (i.e., at the same time or within a couple of hours of each other) on at least 1 day in the past 30 days. 2014-2015 estimates are not available for this measure.

Missouri Student Survey (MSS): Missouri Students in Grades 6-12

Alcohol Use in Past Month	C-01
Binge Alcohol Use in Past 2 Weeks	C-02
Alcohol Impaired Driving, and Riding with Impaired Driver in Past 30 Days	C-03
Cigarette Use in Past 30 Days and Lifetime	C-04
Electronic Cigarette Use in Past 30 Days and Lifetime	C-05
Chewing Tobacco Use in Past 30 Days and Lifetime	C-06
Hookah Use in Past 30 Days and Lifetime	C-07
Inhalant Use in Past 30 Days and Lifetime	C-08
Marijuana Use in Past 30 Days and Lifetime	C-09
Hallucinogen Use in Lifetime	C-10
Club Drug Use in Lifetime	C-11
Synthetic Drug Use in Past 30 Days and Lifetime	C-12
Cocaine Use in Lifetime	C-13
Methamphetamine Use in Lifetime	C-14
Heroin Use in Lifetime	C-15
Non-medical Use of Over-The-Counter Drug in Past 30 Days and Lifetime	C-16
Non-medical Use of Pharmaceutical Drug in Past 30 Days and Lifetime	C-17
Depression in Past 30 Days	C-18
Victim of Covert Bullying in Past 3 Months	C-19
Victim of Aggressive Behavior in Past 3 Months	C-20
Thoughts of Suicide in Past Year	C-21

Missouri Assessment of College Health Behaviors (MACHB): Students in Missouri Universities and Colleges

Alcohol and Tobacco Use	C-22
Marijuana/Cannabis Use	C-23
Illicit Drug Use	C-24
Non-prescribed Pharmaceutical Drug Use	C-25
Data Table for Substance Use Prevalence	C-26
Data Table for Adverse Impacts of Substance Use	C-27
Data Table for Mental Health Issues	C-28

Youth Risk Behavior Survey (YRBS): U.S. and Missouri Students in Grades 9-12

Alcohol Use in Past 30 Days	C-29
Binge Alcohol Use in Past 30 Days	C-30
First Alcohol Use before Age 13	C-31
Cigarette Use in Past 30 Days	C-32
Marijuana Use in Past 30 Days	C-33
Serious Thoughts of Suicide in Past Year	C-34
Data Table for Grade 9	C-35
Data Table for Grade 10	C-36
Data Table for Grade 11	C-37
Data Table for Grade 12	C-38

Pregnancy Risk Assessment and Monitoring System (PRAMS): Mothers of Missouri Newborns

Alcohol Use during Pregnancy	C-39
Tobacco Smoking during Pregnancy	C-40
Substance Use during Pregnancy	C-41
Depression during Pregnancy	C-42
Substance Use Screening during Pregnancy	C-43

Behavioral Risk Factor Surveillance System (BRFSS): U.S. and Missouri Adults

Alcohol Use by U.S. and Missouri Adults Ages 18 and Older	C-44
Prevalence of Tobacco Use by U.S. and Missouri Adults Ages 18 and Older	C-45
Frequency of Tobacco Smoking by U.S. and Missouri Adults Ages 18 and Older	C-46
Mental Health Issues of U.S. and Missouri Adults Ages 18 and Older	C-47

Monitoring The Future Survey (MTF): U.S. High School and College Students and Young Adults

Data Table for U.S. Students in Grade 8	C-48
Data Table for U.S. Students in Grade 10	C-49
Data Table for U.S. Students in Grade 12	C-50
Data Table for U.S. College Students	C-51
Data Table for U.S. Adults Ages 19-30	C-52
Data Table for U.S. Adults Ages 35-50	C-53

ALCOHOL USE: MISSOURI STUDENTS IN GRADES 6-12

Past 30-Day Use of Alcohol: Missouri Students in Grades 6-12

	Grade 6	Grade 7	Grade 8	Grade 9	Grade 10	Grade 11	Grade 12

Footnotes:

NA Data not available.

1 Use of the substance on all 30 days during the 30 days prior to the survey.

2 Use of the substance on at least 1 day during the 30 days prior to the survey

3 Binge alcohol use in the YRBS is defined as males consuming 5 or more drinks in a row and females consuming 4 or more drinks in a row within a couple of hours on at least one day during the past 30 days.

4 Use of cigarettes on 20 or more days during the 30 days prior to the survey.

5 Percentages are among the current smokers.

6 Does not include electronic vapor products.

7 Use of smokeless tobacco products on 20 or more days during the 30 days prior to the survey.

8 Used electronic vapor product on 20 or more days during the 30 days prior to the survey.

9 Use of the substance at least once in lifetime.

10 Prescription pain medicine without a doctor's prescription or differently than how doctor instructed to use it.

11 Student was offered, sold, or given an illegal drug on school property.

Values shown are weighted estimates based on sampling. Apparent differences in values may not be statistically significant.

Footnotes:

NA Data not available.

1 Use of the substance on all 30 days during the 30 days prior to the survey.

2 Use of the substance on at least 1 day during the 30 days prior to the survey

3 Binge alcohol use in the YRBS is defined as males consuming 5 or more drinks in a row and females consuming 4 or more drinks in a row within a couple of hours on at least one day during the past 30 days.

4 Use of cigarettes on 20 or more days during the 30 days prior to the survey.

5 Percentages are among the current smokers.

6 Does not include electronic vapor products.

7 Use of smokeless tobacco products on 20 or more days during the 30 days prior to the survey.

8 Used electronic vapor product on 20 or more days during the 30 days prior to the survey.

9 Use of the substance at least once in lifetime.

10 Prescription pain medicine without a doctor's prescription or differently than how doctor instructed to use it.

11 Student was offered, sold, or given an illegal drug on school property.

Values shown are weighted estimates based on sampling. Apparent differences in values may not be statistically significant.

Data Source: U.S. Department of Health and Human Services, Centers for Disease Control and Prevention. High School Youth Risk Behavior Survey.

* Binge alcohol use in the Monitoring the Future Survey is defined as consuming 5 or more drinks on the same occasion on at least one day in the past two weeks.

‡ Survey question was re-worded and/or estimate was revised beginning with year indicated. Figures are percentage estimates.

§ Estimate is not calculated due to small sample size.

* Binge alcohol use in the Monitoring the Future Survey is defined as consuming 5 or more drinks on the same occasion on at least one day in the past two weeks.

‡ Survey question was re-worded and/or estimate was revised beginning with year indicated. Figures are percentage estimates.

§ Estimate is not calculated due to small sample size.

Data Source: Miech, RA; Johnston, LD; Patrick, ME; O'Malley, PM; Bachman, JG, & Schulenberg, JE (2023). Monitoring the Future national survey results on drug use, 1975-2022: Secondary school students. Monitoring the Future Monograph Series. Ann Arbor, MI: Institute for Social Research, University of Michigan.

2020 E.R. Outpatient	18,441	6,615	1,765	5,149	3,319	1,593
2021 E.R. Outpatient	18,371	6,650	1,917	5,056	3,118	1,630

Emergency Room Services followed by Hospitalization, Primarily for Alcohol Use, by Planning Region and Year

	Missouri	Northwest Missouri	Central Missouri	Eastern Missouri	Southwest Missouri	Southeast Missouri
2016 E.R. Hospitalization	5,847	978	811	1,894	1,800	364
2017 E.R. Hospitalization	5,788	1,007	643	2,006	1,794	338
2018 E.R. Hospitalization	5,891	994	621	1,967	1,944	365
2019 E.R. Hospitalization	3,358	557	333	1,250	995	223
2020 E.R. Hospitalization	5,439	865	621	1,891	1,783	279
2021 E.R. Hospitalization	5,414	956	556	2,076	1,542	284

Direct Hospitalization without Emergency Room, Primarily for Alcohol Use, by Planning Region and Year

	Missouri	Northwest Missouri	Central Missouri	Eastern Missouri	Southwest Missouri	Southeast Missouri
2016 Direct Hospitalization	3,504	1,560	254	1,017	320	353
2017 Direct Hospitalization	3,807	1,581	306	1,173	337	410
2018 Direct Hospitalization	4,153	1,748	368	1,240	326	471
2019 Direct Hospitalization	3,187	1,206	243	1,081	357	300
2020 Direct Hospitalization	4,268	2,017	338	1,098	406	409
2021 Direct Hospitalization	4,486	2,033	382	1,309	376	386

Data are aggregated to the same analysis regions used for the National Survey on Drug Use and Health (NSDUH) Missouri region estimates (see map in Appendix).
Counts for these charts are based on ICD-10 diagnosis codes selected by the national Healthcare Cost and Utilization Program (HCUP).
Due to the transition from ICD-9 coding in 2015, data prior to 2016 are not included. Pre-2016 hospital counts are available in earlier Status Reports.
Beginning with calendar year 2020 data, individuals with more than one treatment episode during the year are counted for each episode.

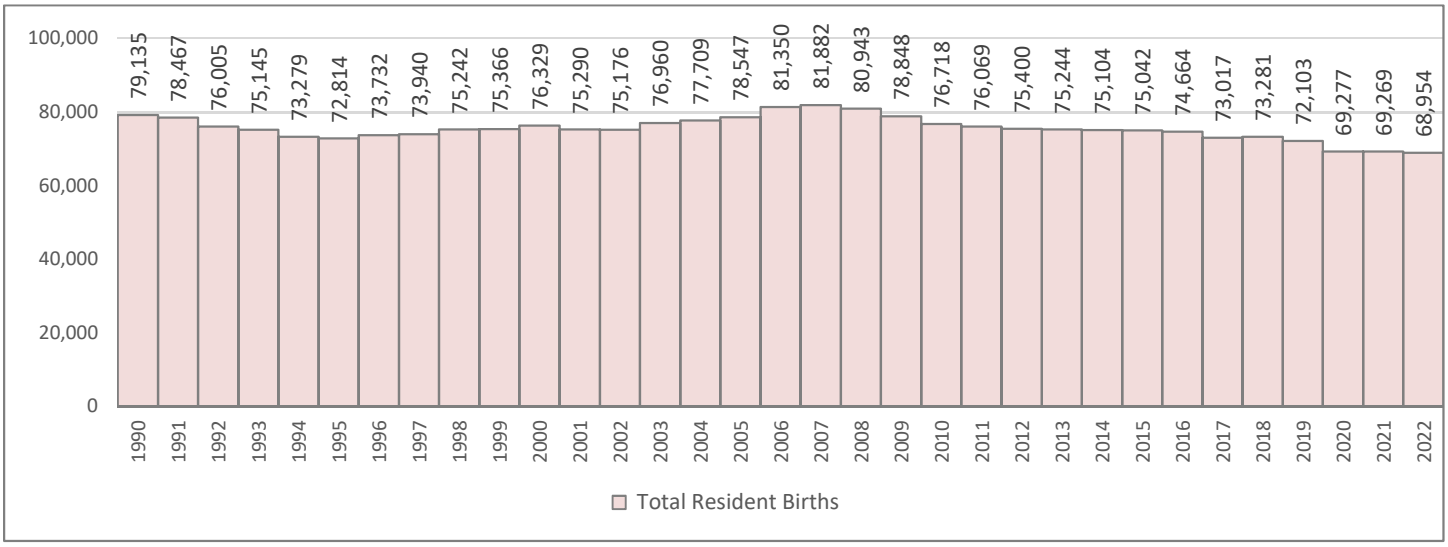
BIRTHS

Missouri Resident Births, by Year



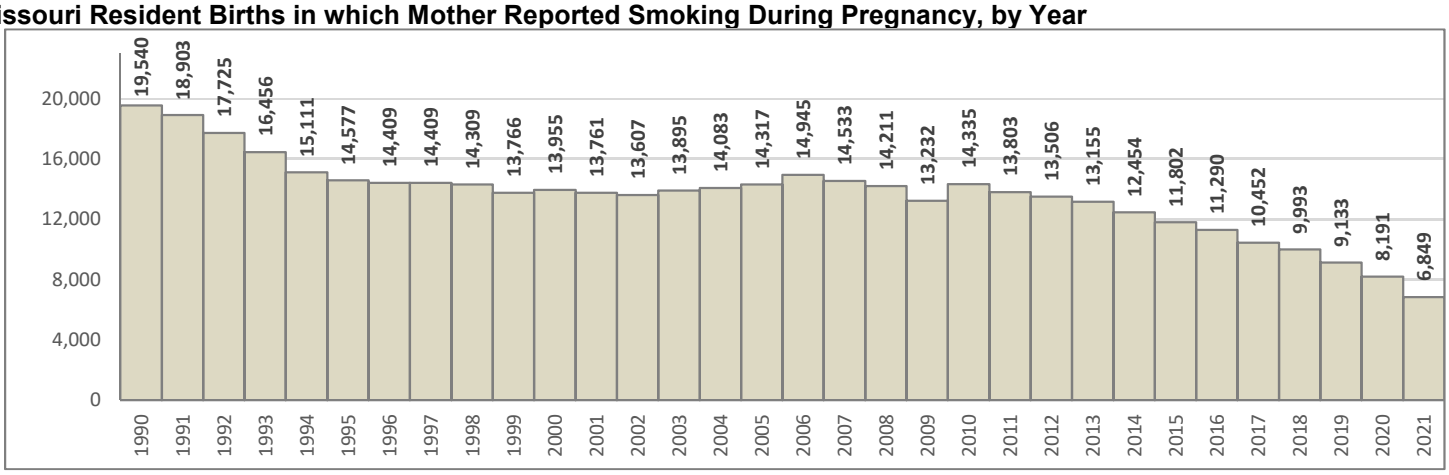
Resident birth data for 2022 are provisional.

Missouri Newborns Affected by Maternal Substance Use, by Year

	2016	2017	2018	2019	2020	2021
Newborn Affected by Alcohol	33	56	41	63	41	33
Fetal Alcohol Spectrum Disorder	4	67	15	134	92	4
Newborn Affected by Maternal Use of Tobacco	951	937	902	855	644	951
Newborn Exposure to Cocaine	70	111	105	103	121	70
Newborn Exposure to Narcotic	1823	1925	1784	1,201	1,265	1823
Newborn Exposure to Unspecified Drug	57	53	226	384	289	57
Newborn Withdrawal Syndrome/Symptoms	518	447	498	518	589	518

Beginning fully in 2016, ICD-10 medical coding replaced ICD-9. Also beginning in 2016, newborns exposed to more than one substance are counted in each applicable category. Due to these changes in criteria and methodology, pre-2016 exposure data are not included.

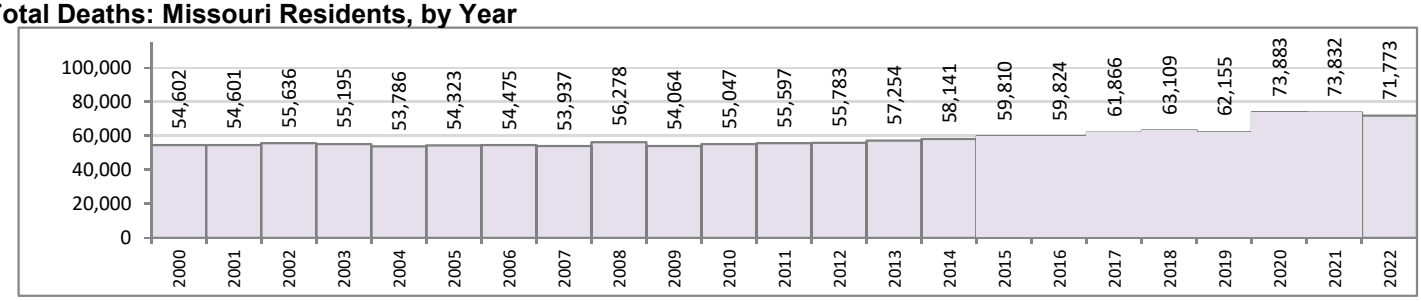
Missouri Resident Births in which Mother Reported Smoking During Pregnancy, by Year



Data Source (all charts): Missouri Department of Health and Senior Services.

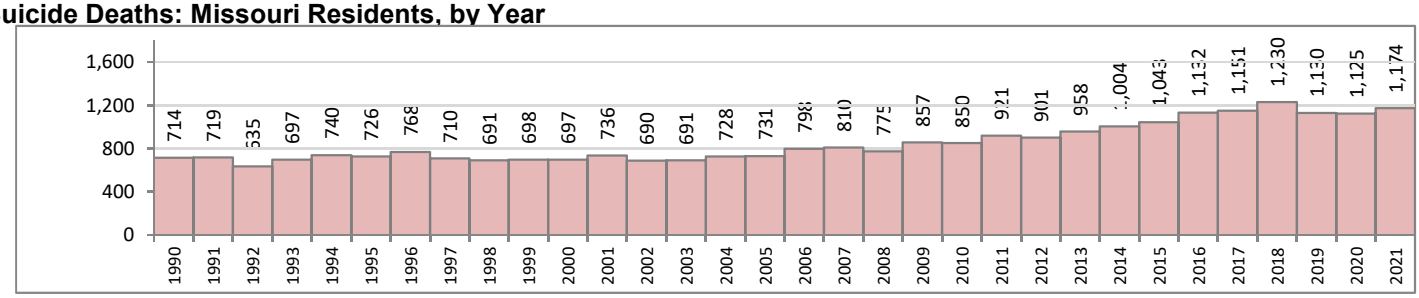
DEATHS

Total Deaths: Missouri Residents, by Year

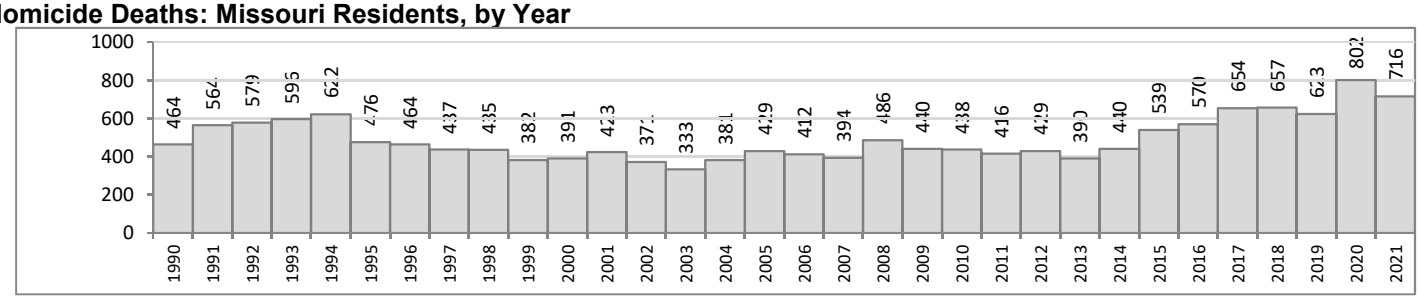


Resident death data for 2022 are provisional.

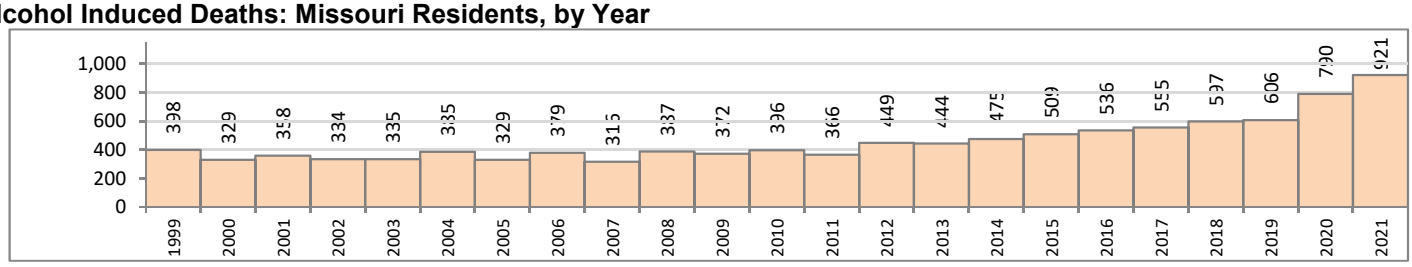
Suicide Deaths: Missouri Residents, by Year



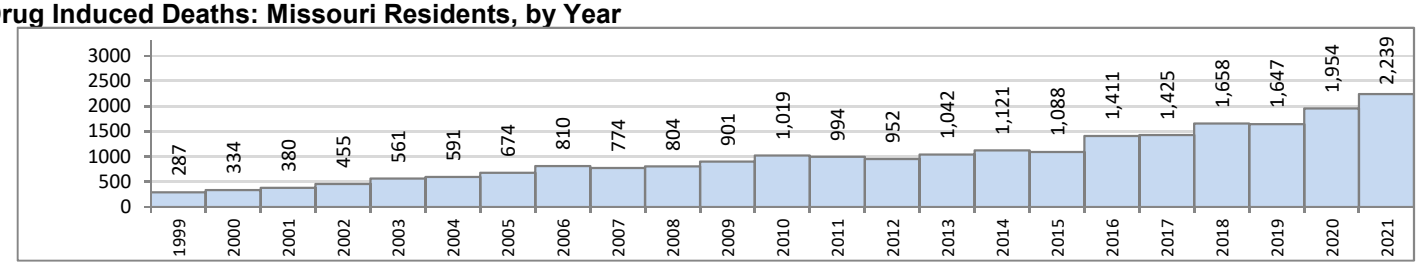
Homicide Deaths: Missouri Residents, by Year



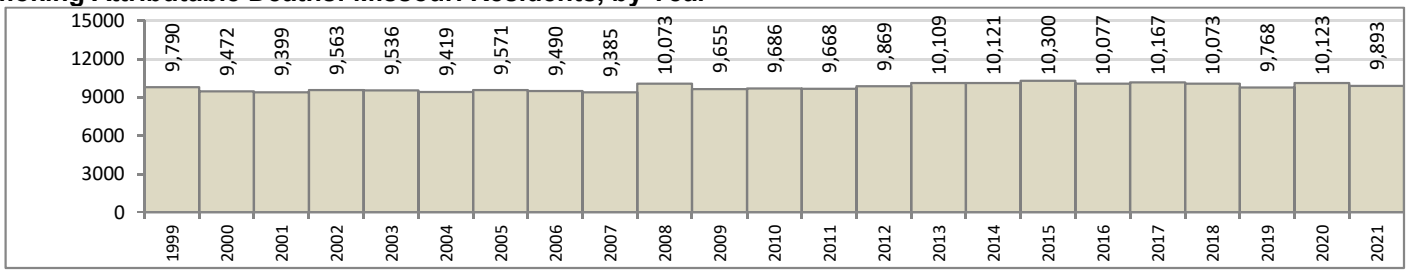
Alcohol Induced Deaths: Missouri Residents, by Year



Drug Induced Deaths: Missouri Residents, by Year



Smoking Attributable Deaths: Missouri Residents, by Year



Data Source (all charts): Missouri Department of Health and Senior Services.

Parental Drug Use Reported	2	10	4
Parental Use of Both Alcohol and Drugs Reporte	0	0	0

Source: Missouri Department of Social Services, Children's Division

* The Children's Division reports do not encompass all reasons for a removal from home but document adverse conditions. Multiple factors are often considered when a child is placed out of the home. Removals involving parental substance use conditions are included in this profile. Some 2022 data are not fully compatible with prior years' data due to category changes.

* The Children's Division reports do not encompass all reasons for a removal from home but document adverse conditions. Multiple factors are often considered when a child is placed out of the home. Removals involving parental substance use conditions are included in this profile. Some 2022 data are not fully compatible with prior years' data due to category changes.

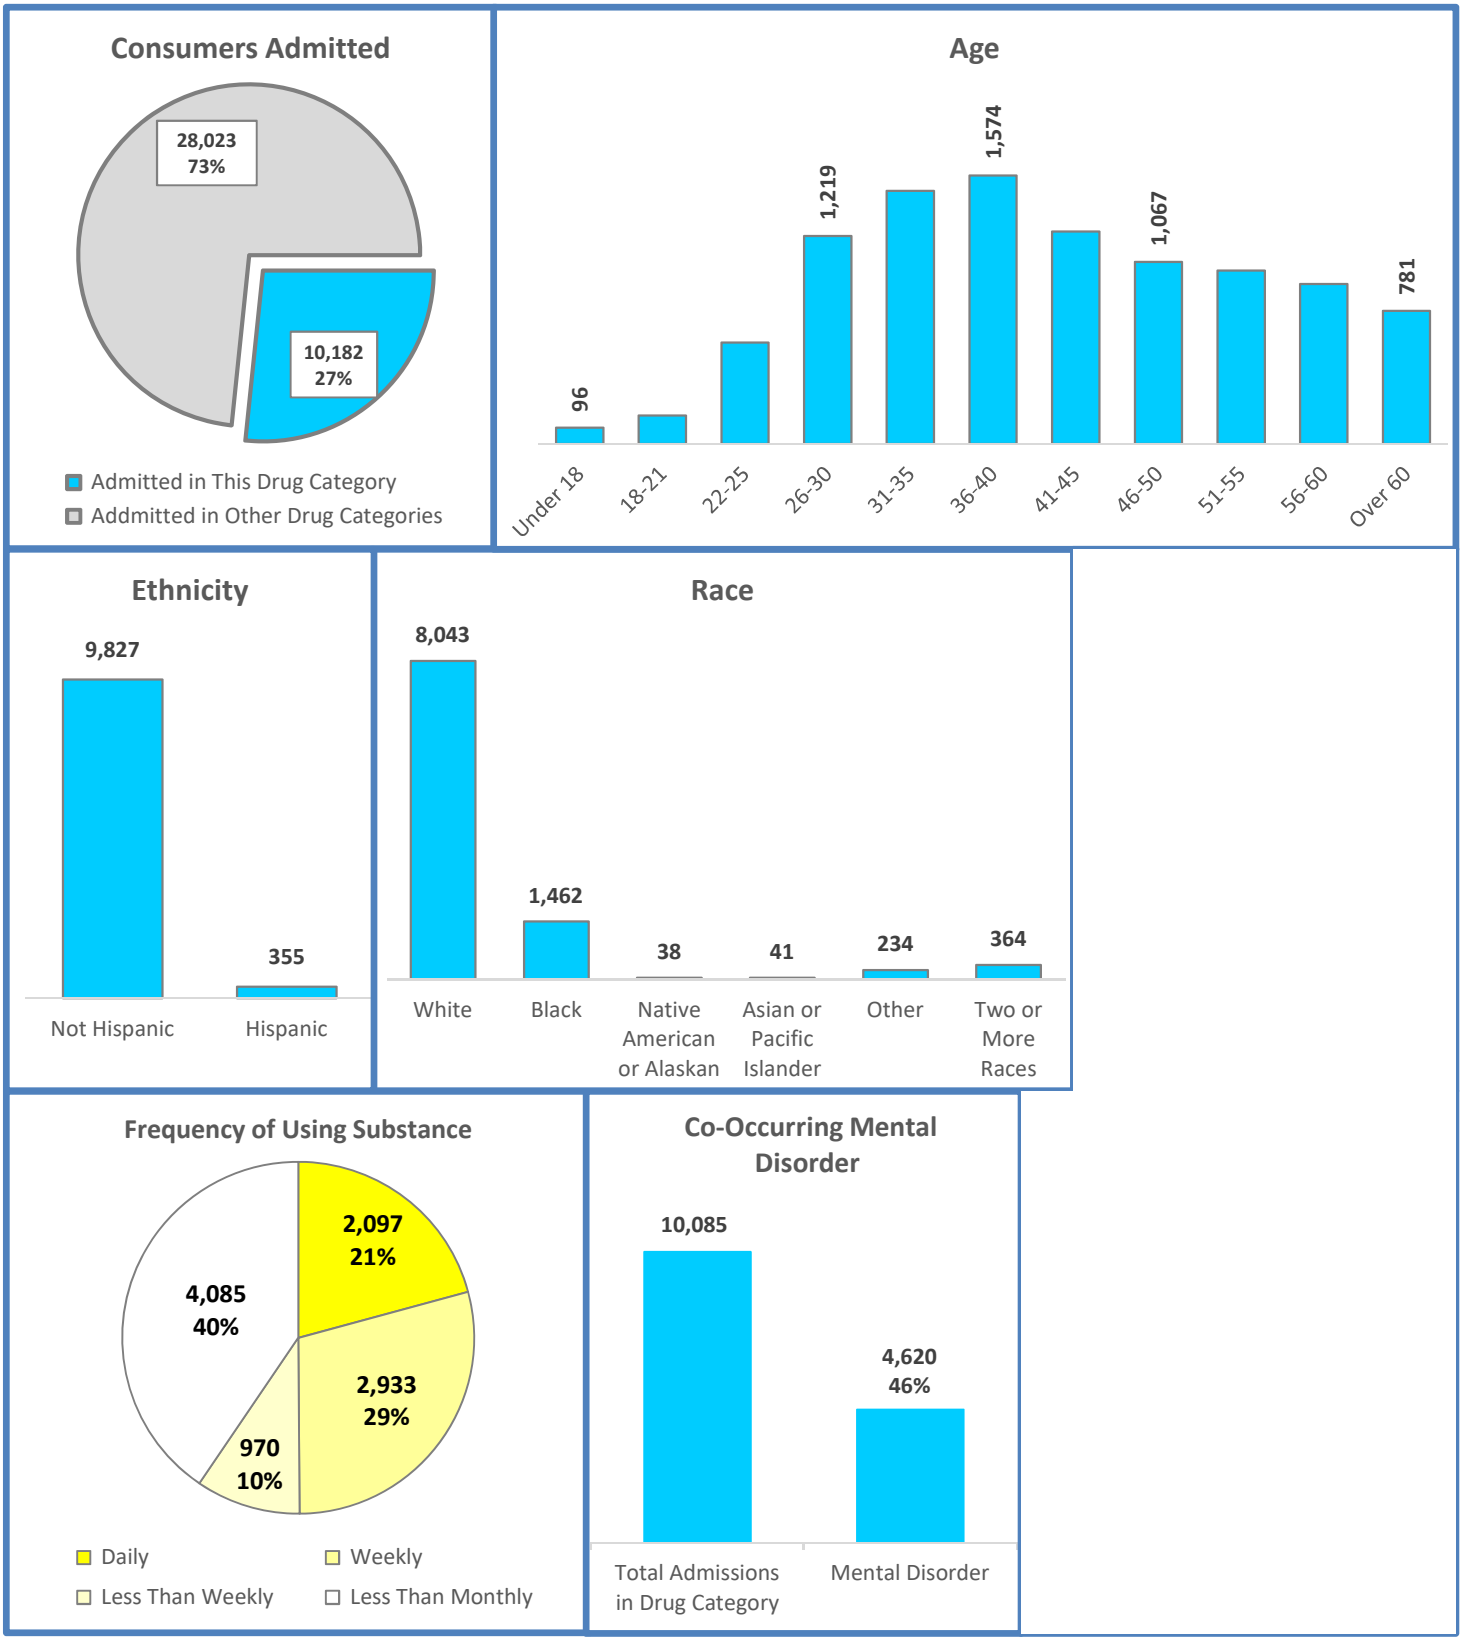
ALCOHOL

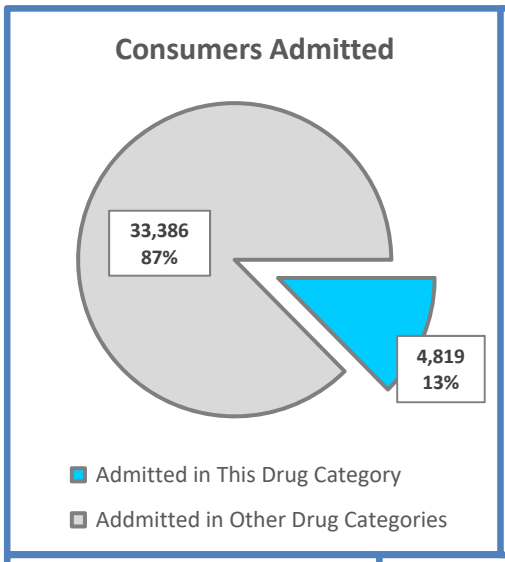
Statewide Substance Use Disorder Treatment Admissions in Fiscal Year 2022

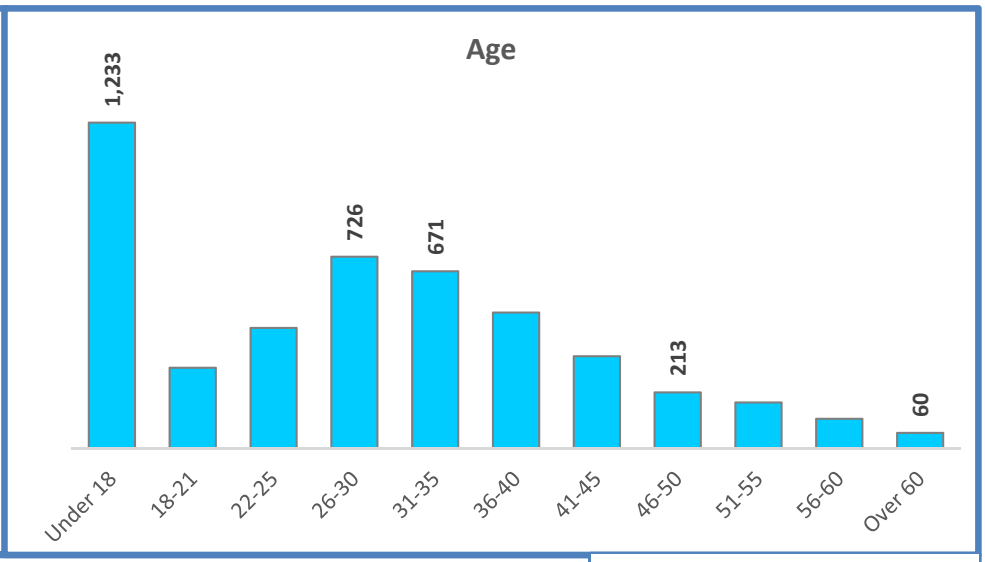


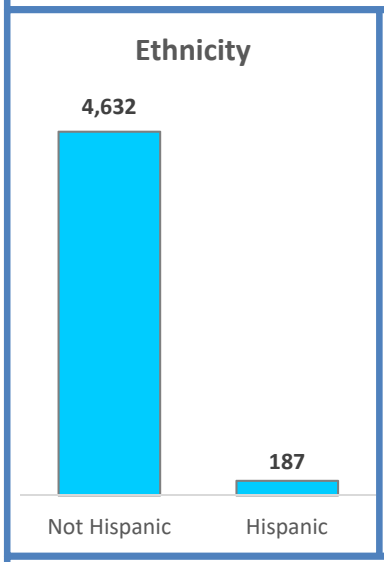
This profile summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 for substance use disorders. Consumers are counted in only one drug category based on their primary substance of concern when beginning their first episode of care. Some consumers also have a co-occurring mental disorder or developmental disability.

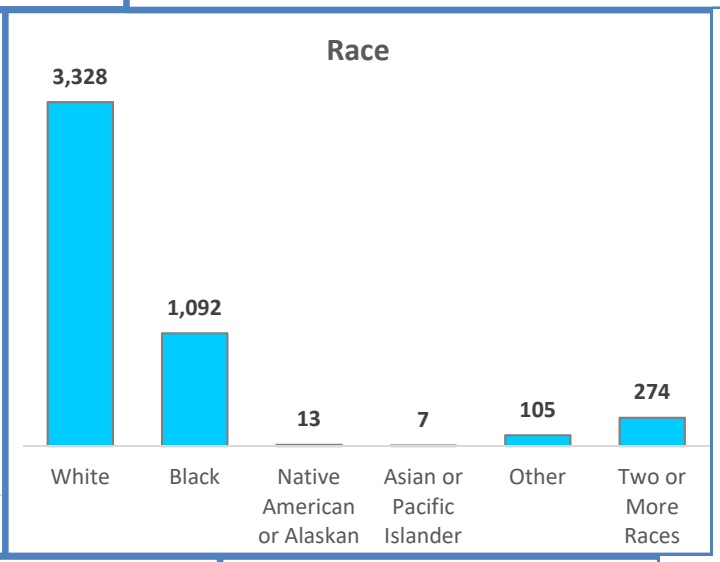
MARIJUANA

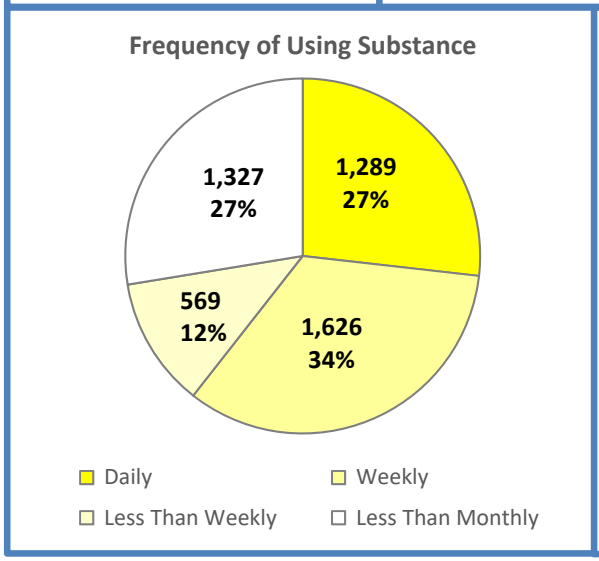
Statewide Substance Use Disorder Treatment Admissions in Fiscal Year 2022

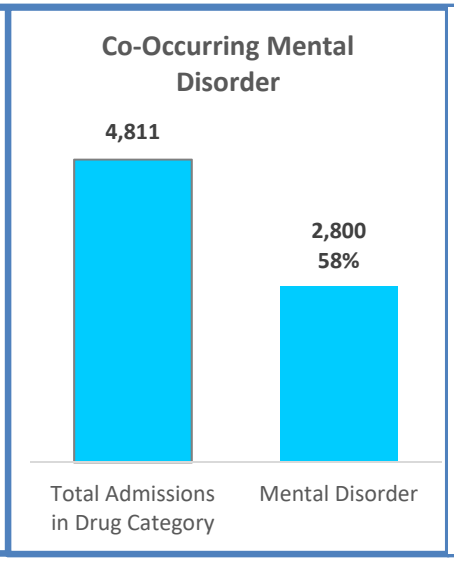








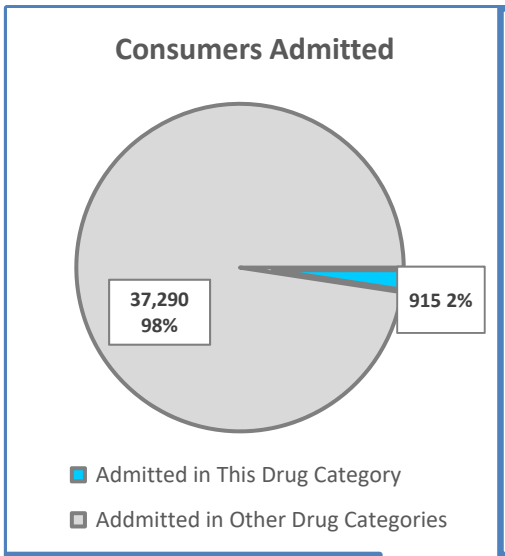


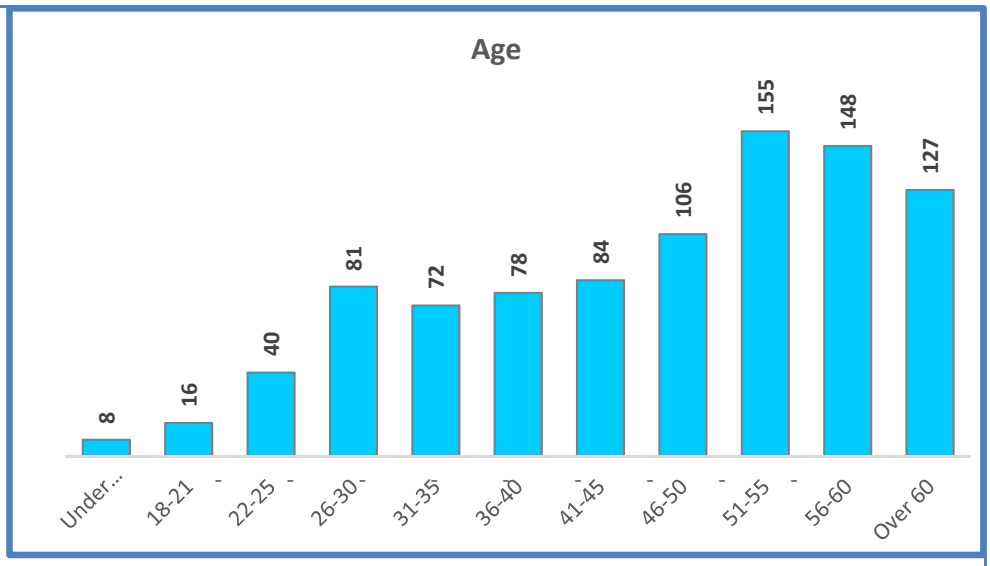


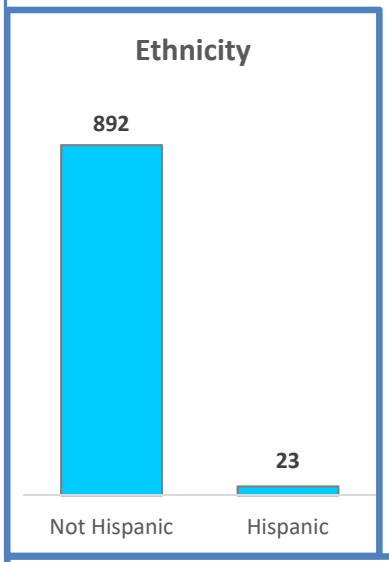
This profile summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 for substance use disorders. Consumers are counted in only one drug category based on their primary substance of concern when beginning their first episode of care. Some consumers also have a co-occurring mental disorder or developmental disability.

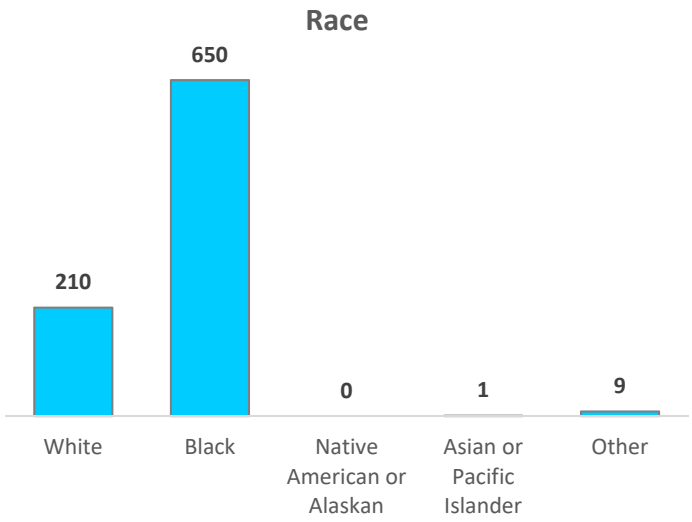
COCAINE

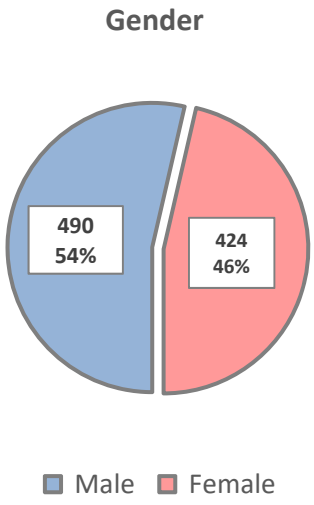
Statewide Substance Use Disorder Treatment Admissions in Fiscal Year 2022

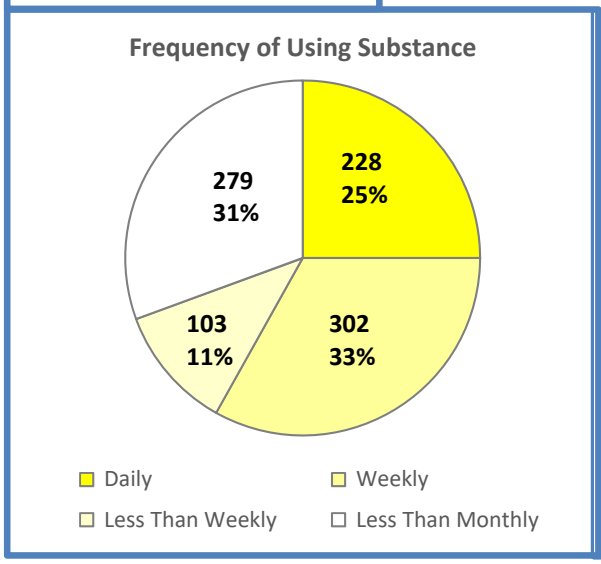


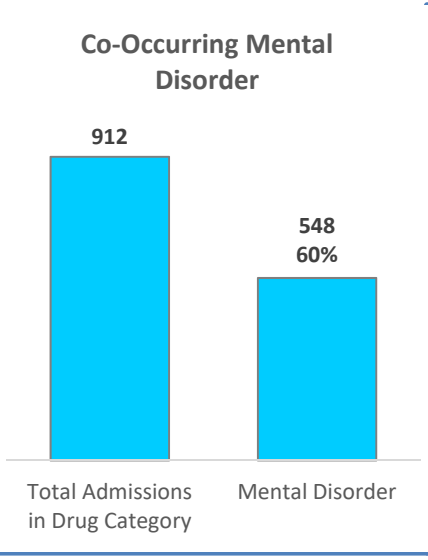


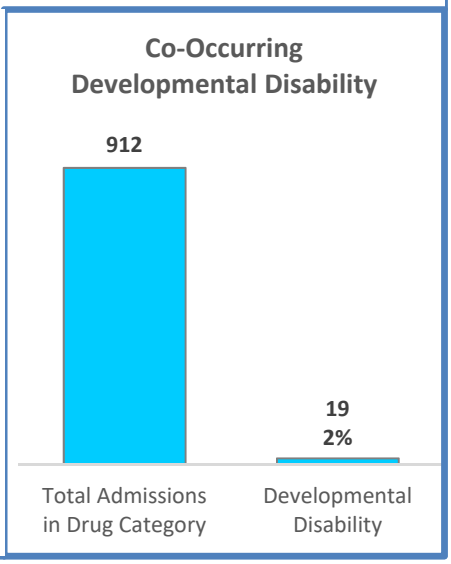








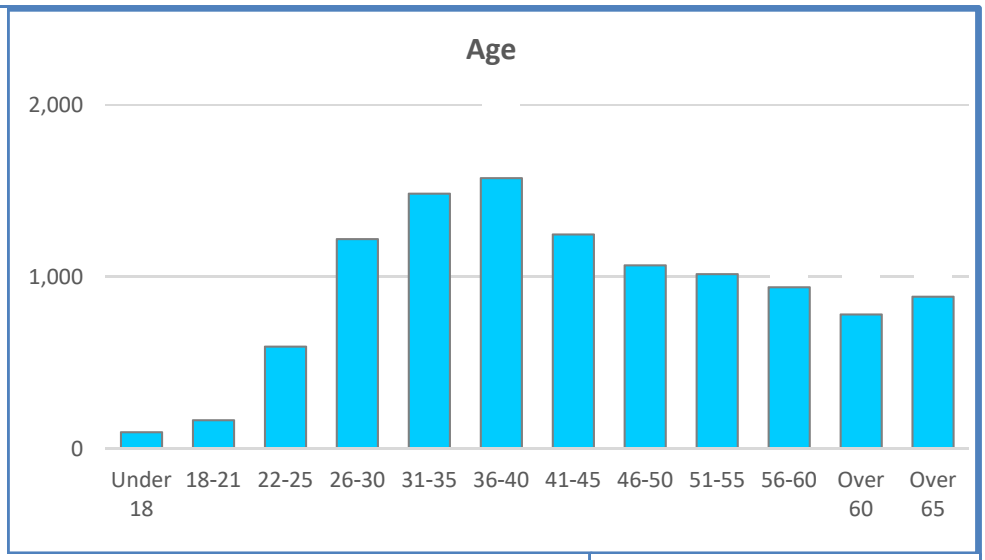


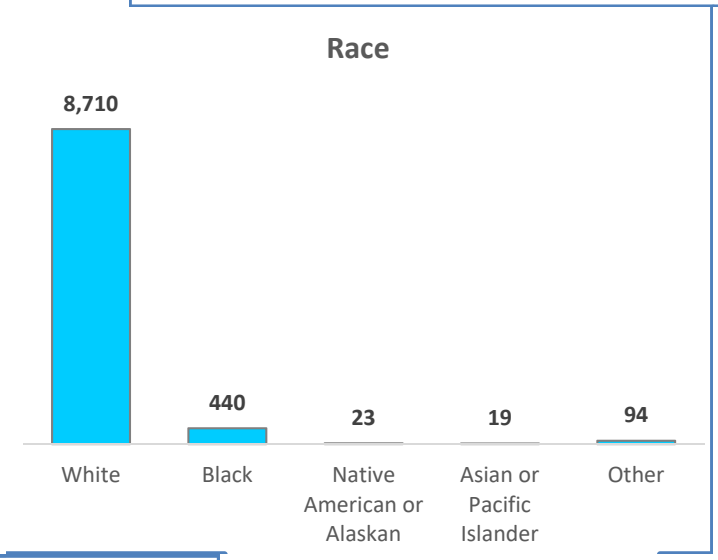


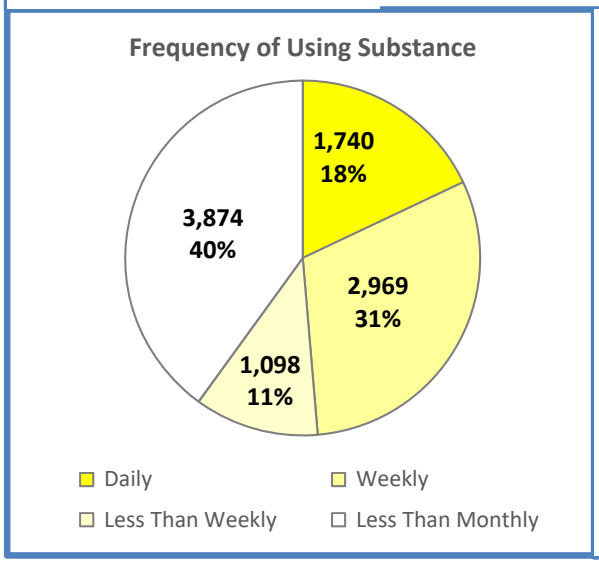
This profile summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 for substance use disorders. Consumers are counted in only one drug category based on their primary substance of concern when beginning their first episode of care. Some consumers also have a co-occurring mental disorder or developmental disability.

METHAMPHETAMINE

Statewide Substance Use Disorder Treatment Admissions in Fiscal Year 2022



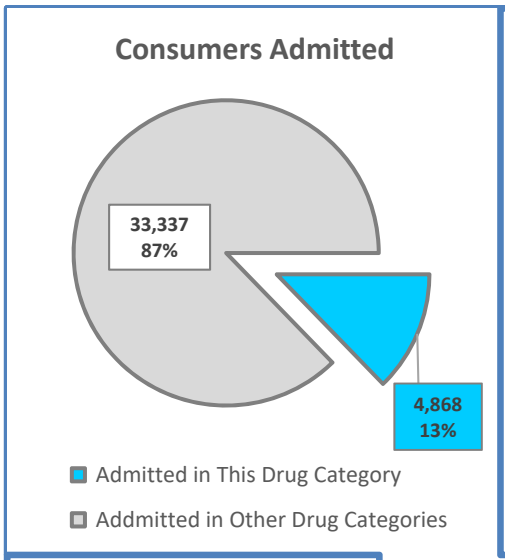


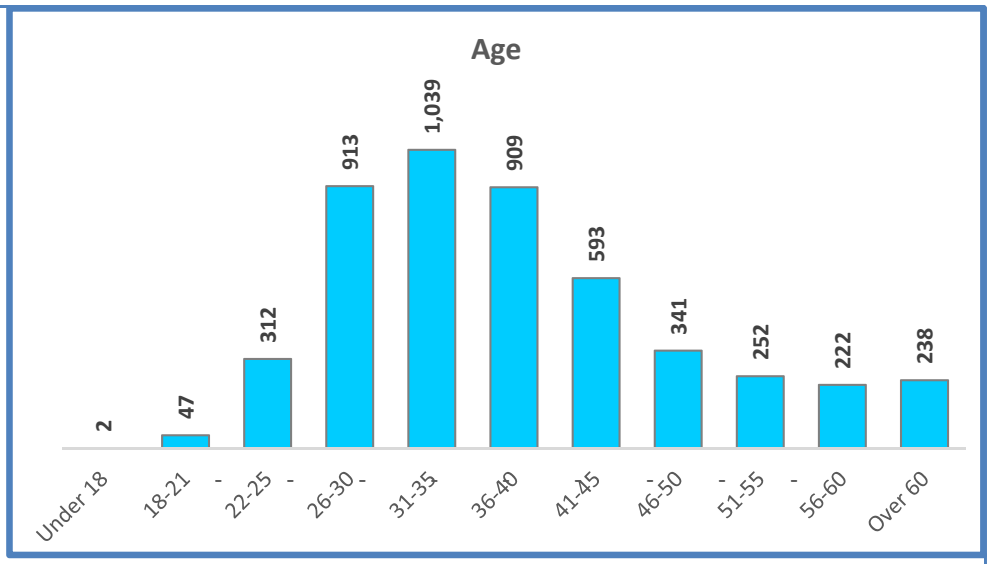


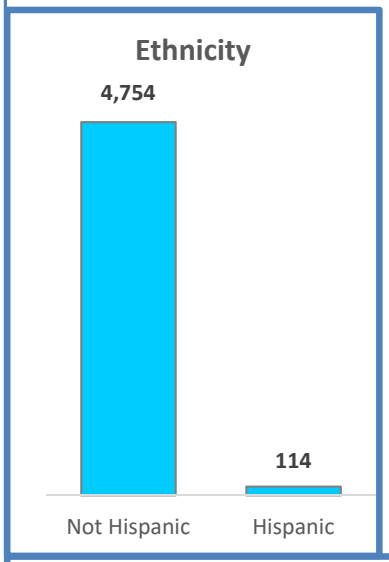
This profile summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 for substance use disorders. Consumers are counted in only one drug category based on their primary substance of concern when beginning their first episode of care. Some consumers also have a co-occurring mental disorder or developmental disability.

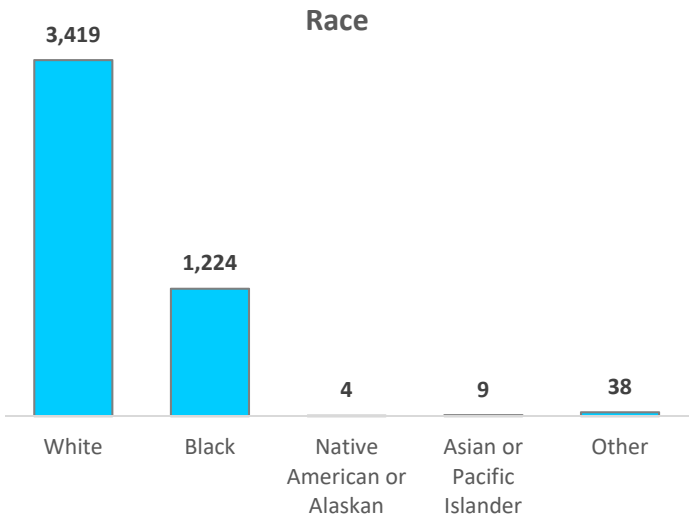
HEROIN

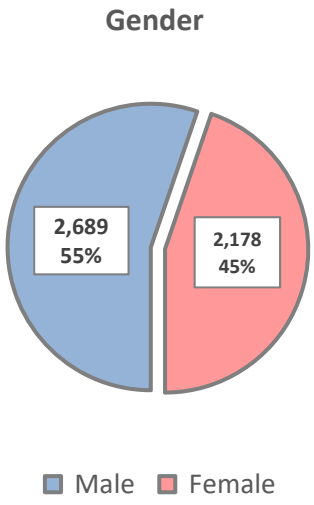
Statewide Substance Use Disorder Treatment Admissions in Fiscal Year 2022

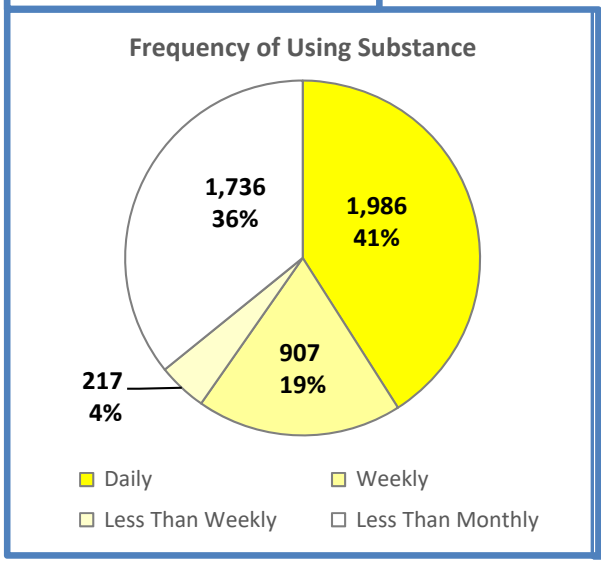


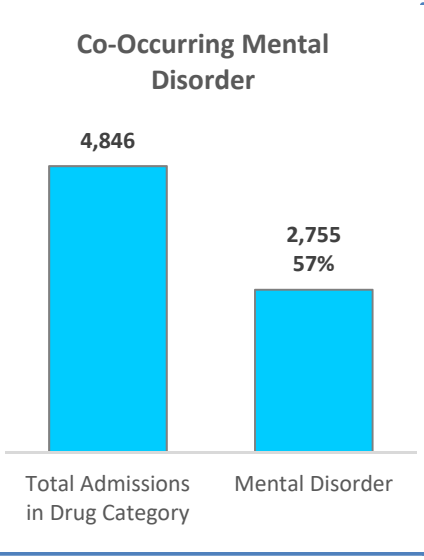


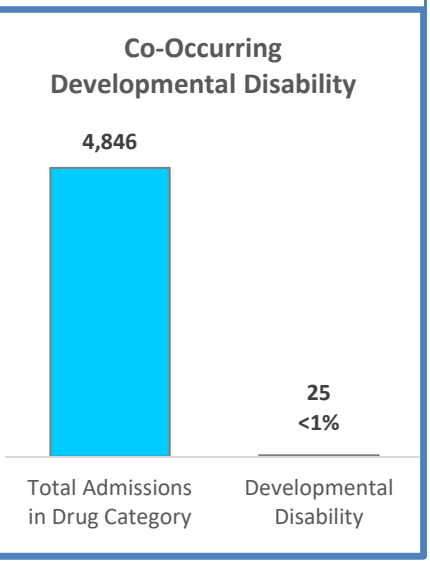








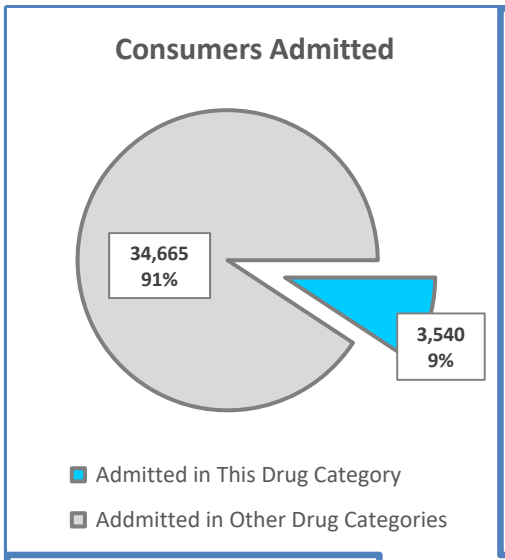


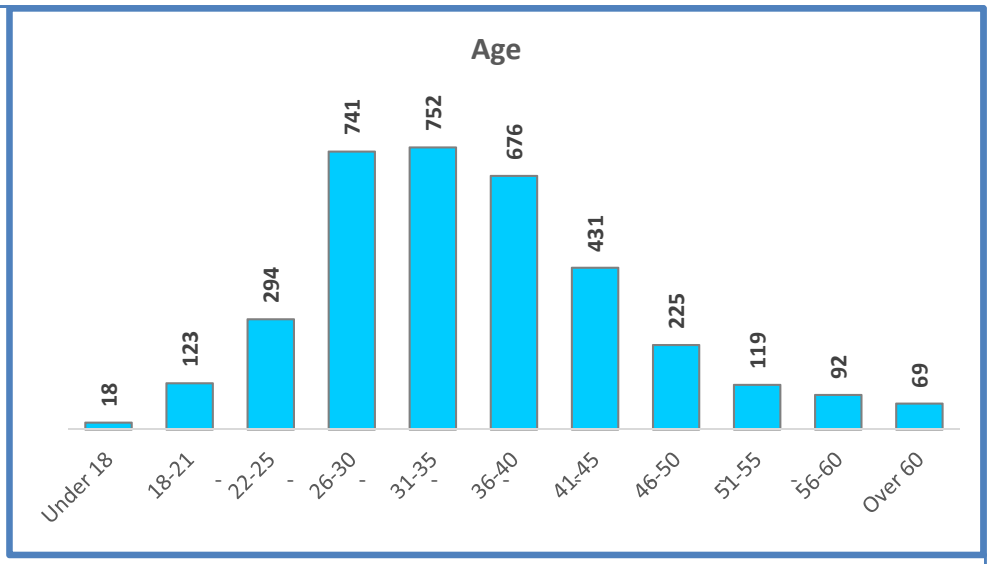


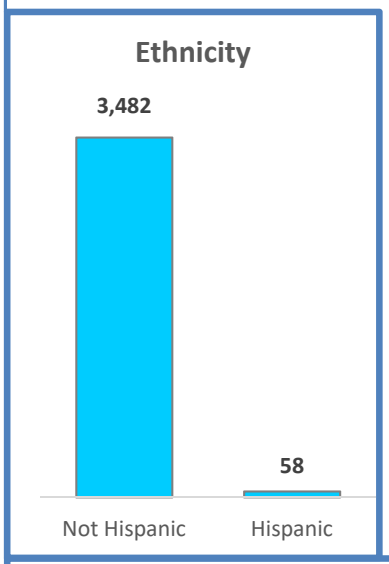
This profile summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 for substance use disorders. Consumers are counted in only one drug category based on their primary substance of concern when beginning their first episode of care. Some consumers also have a co-occurring mental disorder or developmental disability.

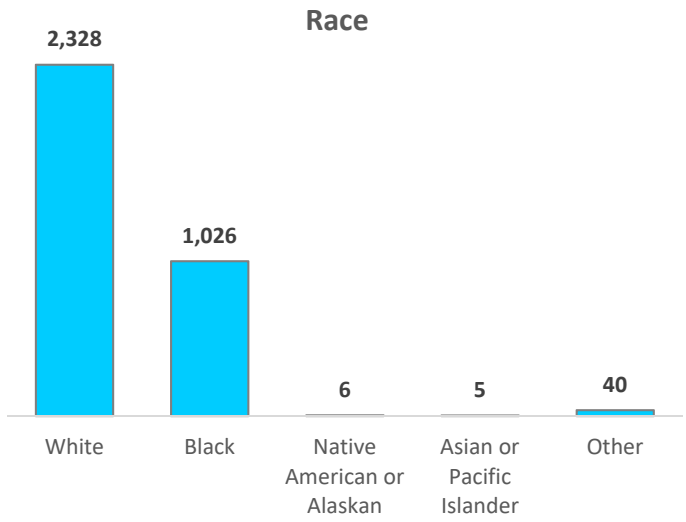
FENTANYL

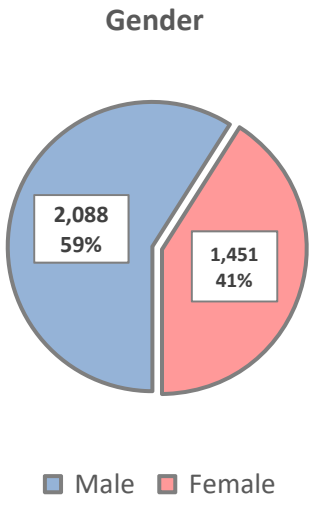
Statewide Substance Use Disorder Treatment Admissions in Fiscal Year 2022

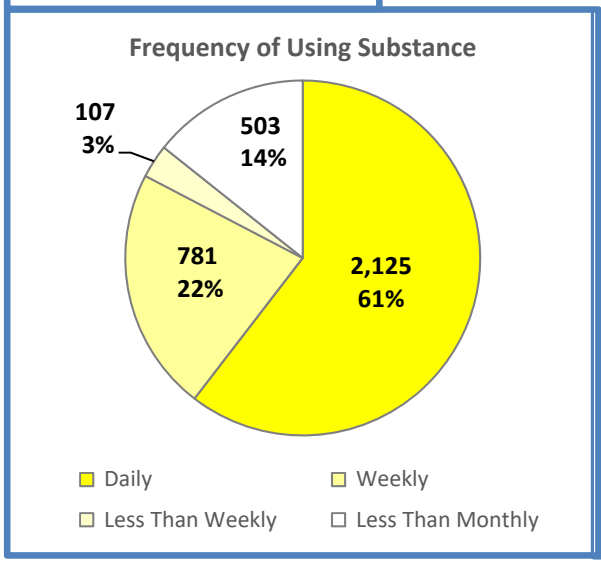


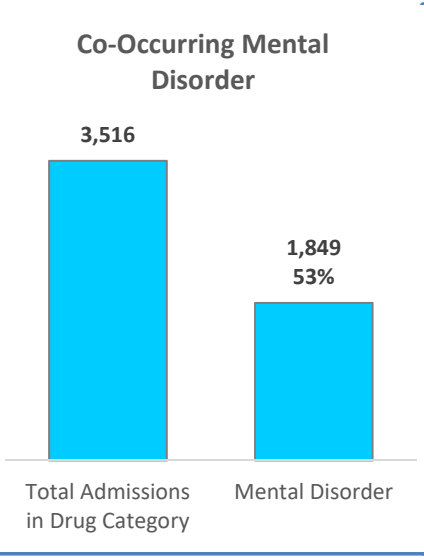


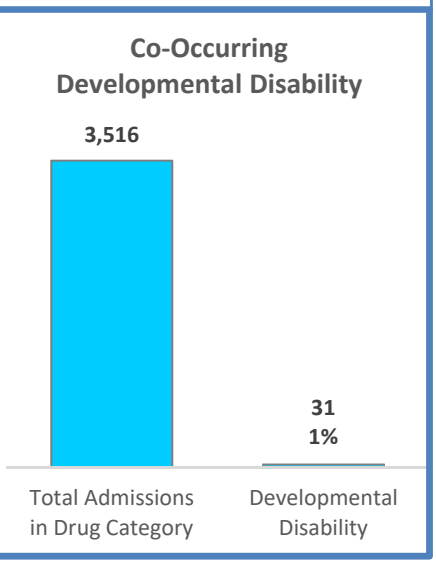








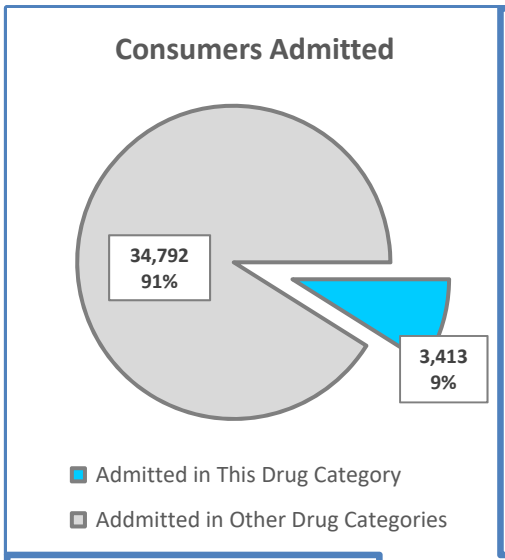


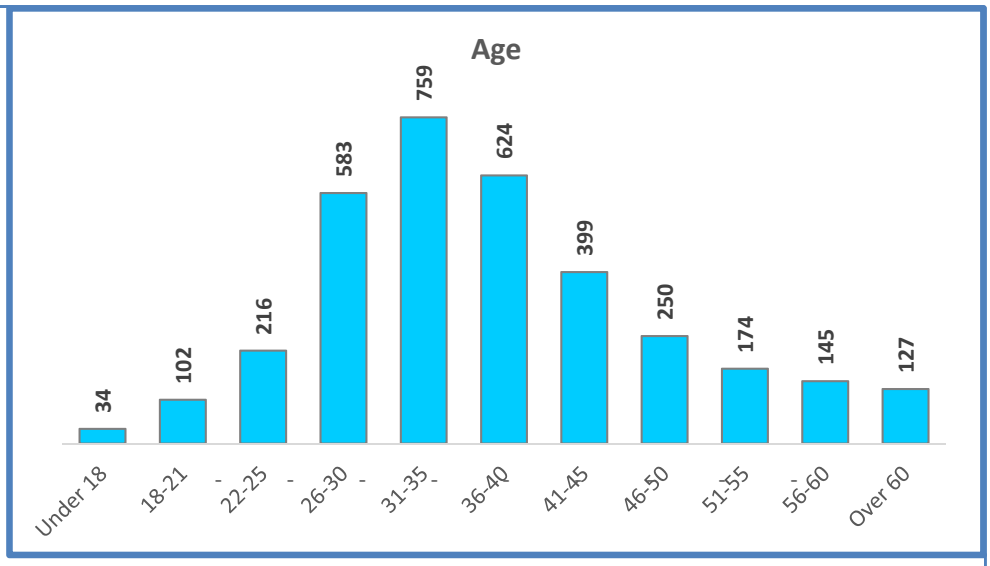


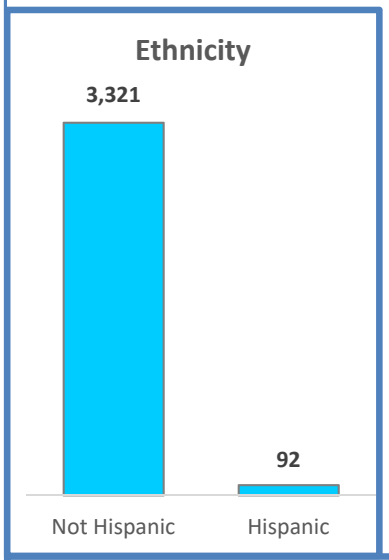
This profile summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 for substance use disorders. Consumers are counted in only one drug category based on their primary substance of concern when beginning their first episode of care. Some consumers also have a co-occurring mental disorder or developmental disability.

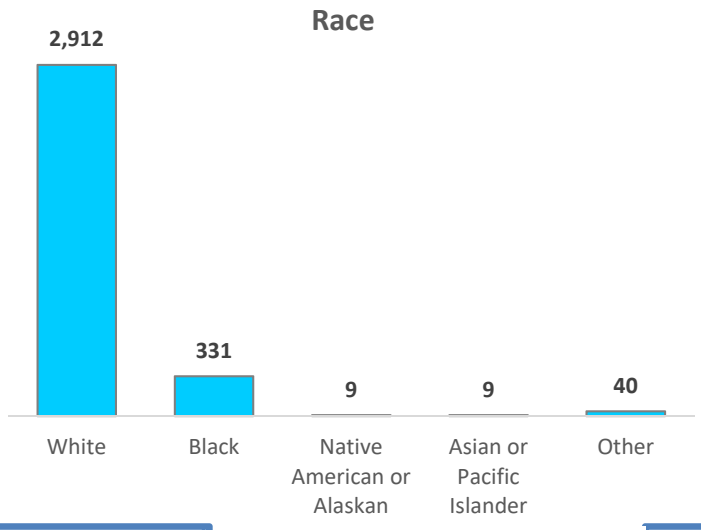
PRESCRIPTION OPIOIDS

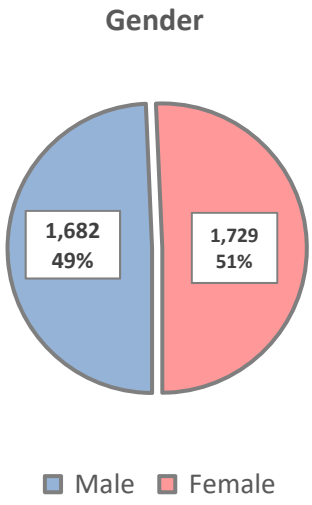
Statewide Substance Use Disorder Treatment Admissions in Fiscal Year 2022

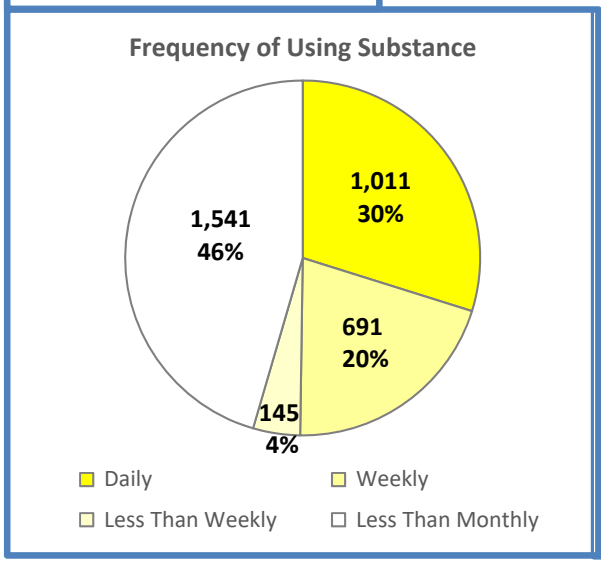


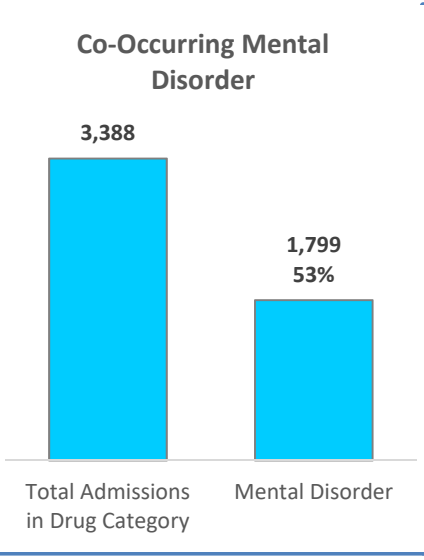


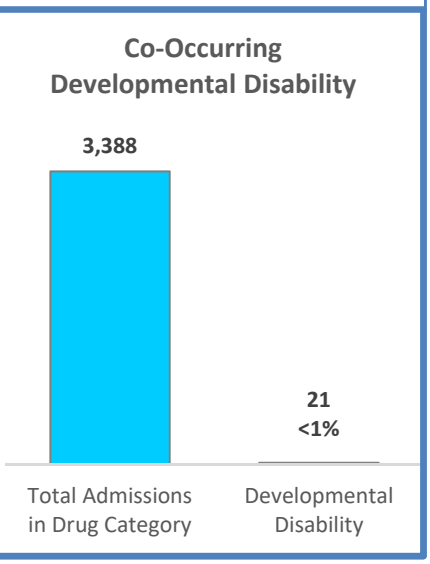








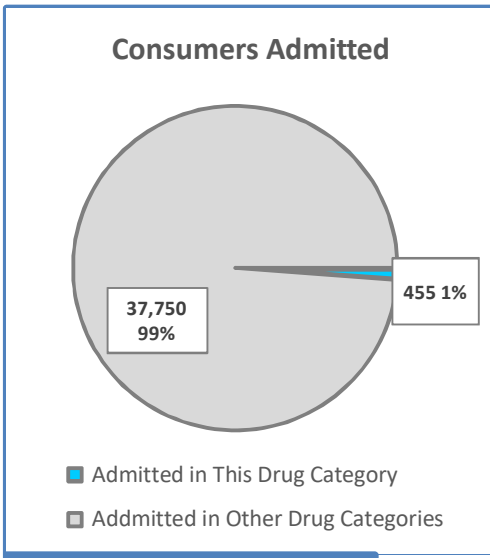


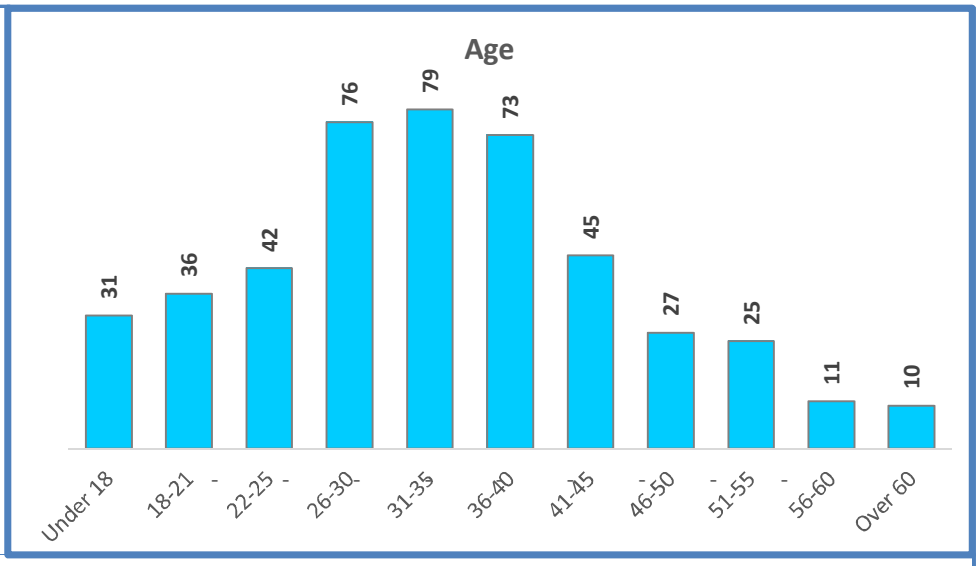


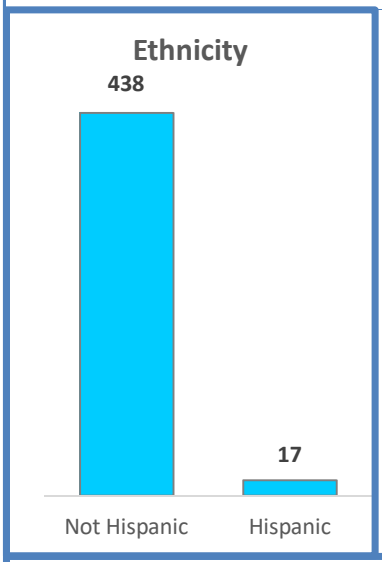
This profile summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 for substance use disorders. Consumers are counted in only one drug category based on their primary substance of concern when beginning their first episode of care. Some consumers also have a co-occurring mental disorder or developmental disability.

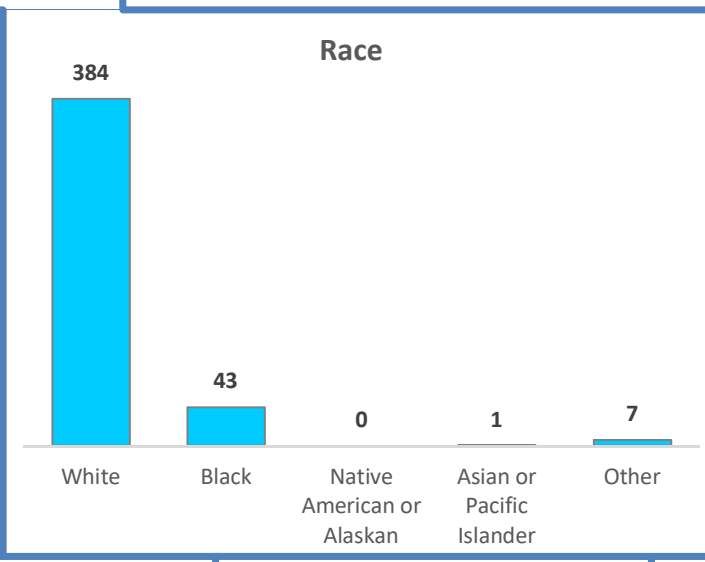
PRESCRIPTION NON-OPIOIDS

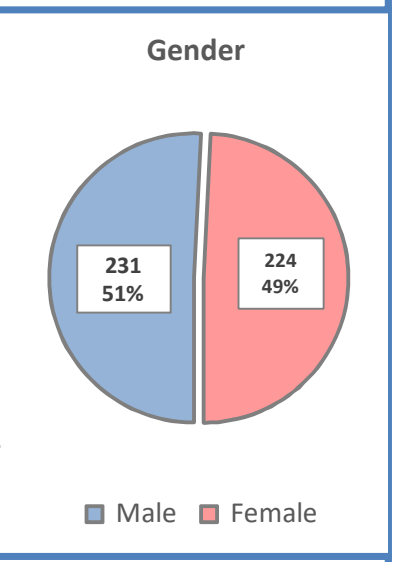
Statewide Substance Use Disorder Treatment Admissions in Fiscal Year 2022

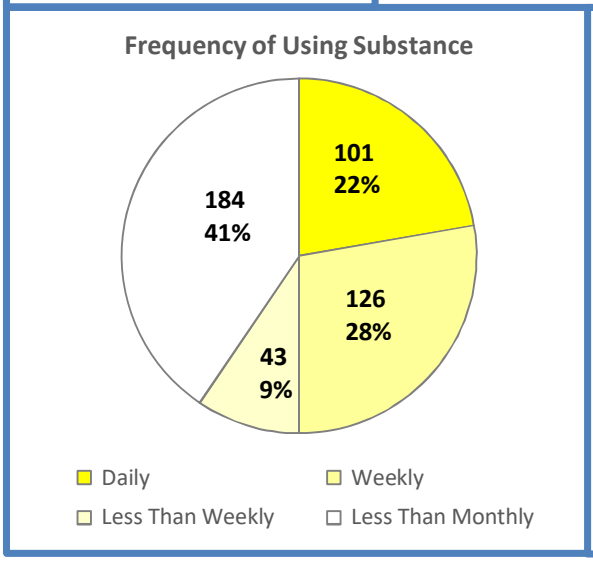


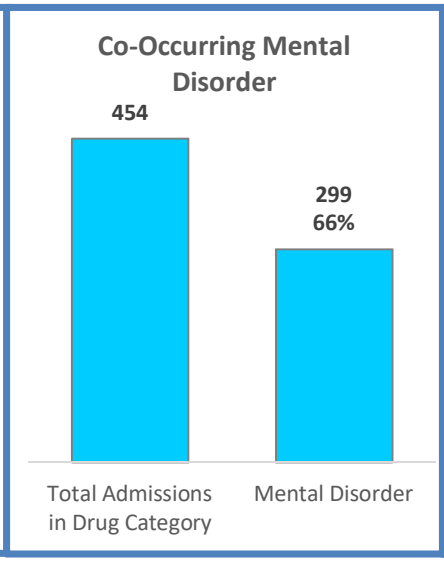


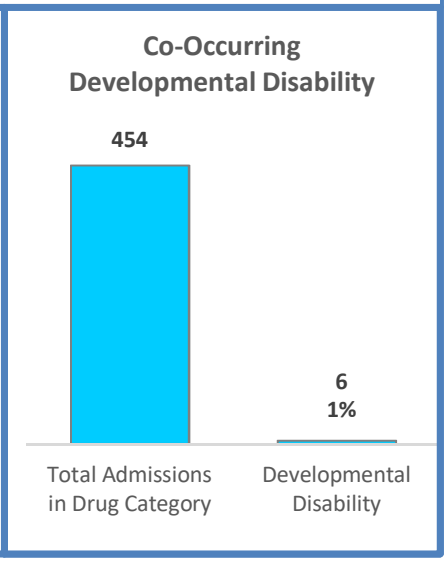








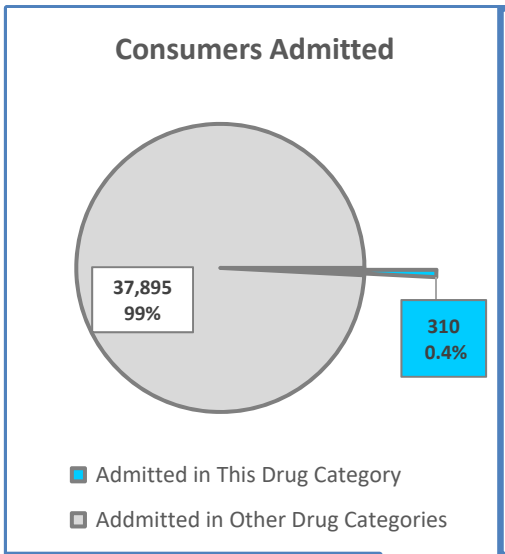


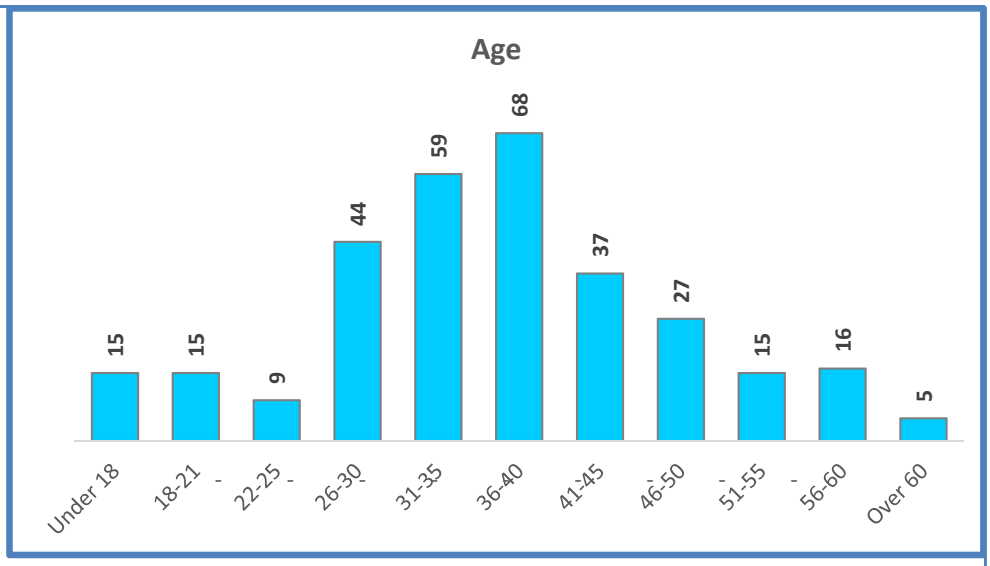


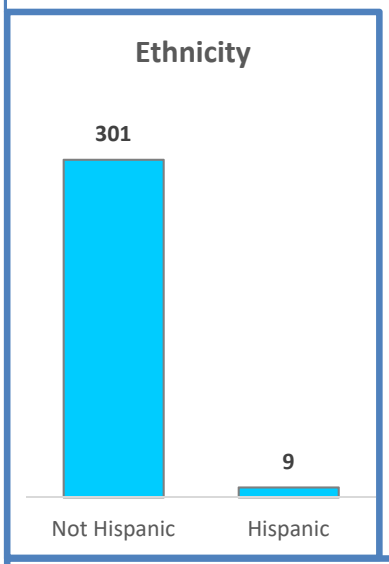
This profile summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 for substance use disorders. Consumers are counted in only one drug category based on their primary substance of concern when beginning their first episode of care. Some consumers also have a co-occurring mental disorder or developmental disability.

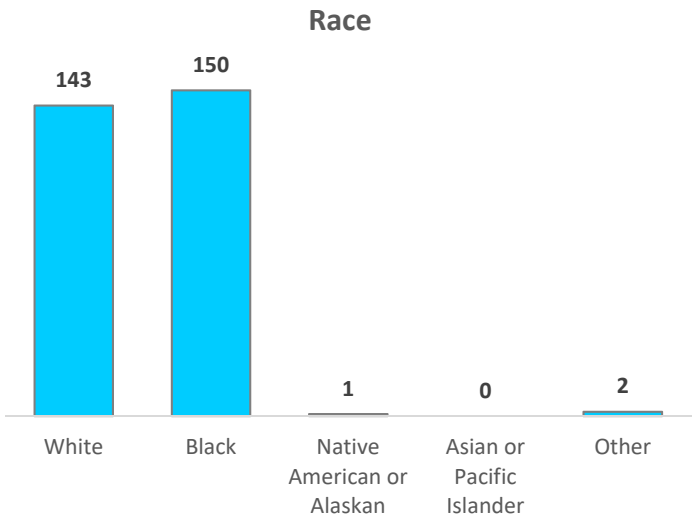
INHALANTS, HALLUCINOGENS, AND OTHER SUBSTANCES

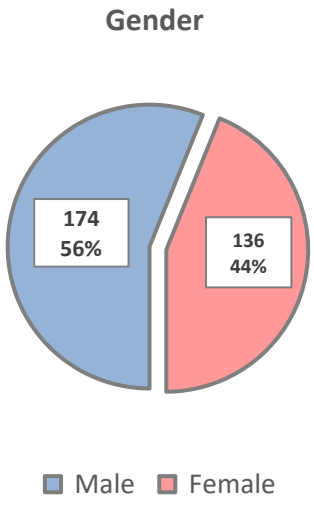
Statewide Substance Use Disorder Treatment Admissions in Fiscal Year 2022

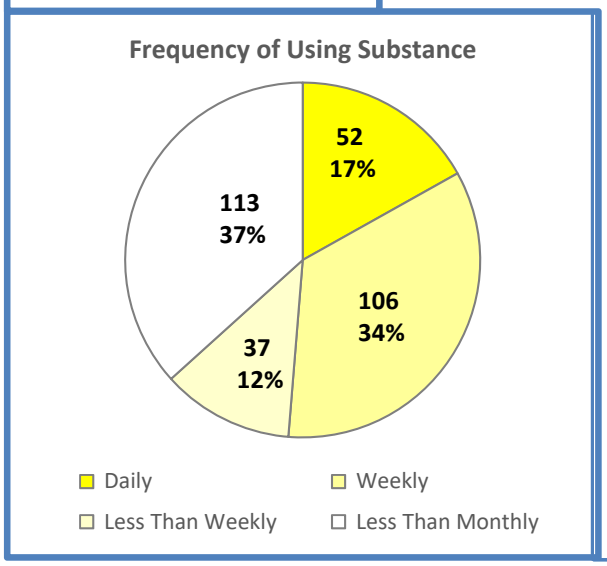


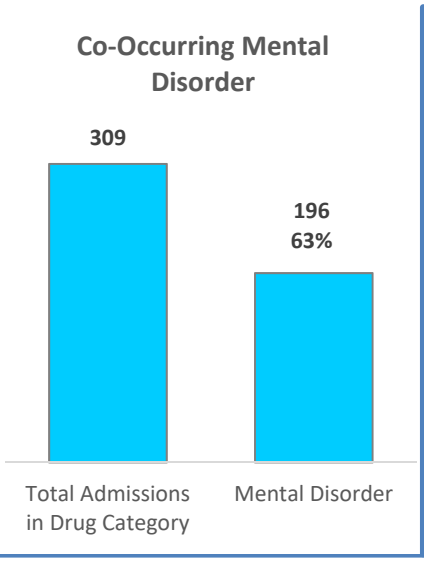


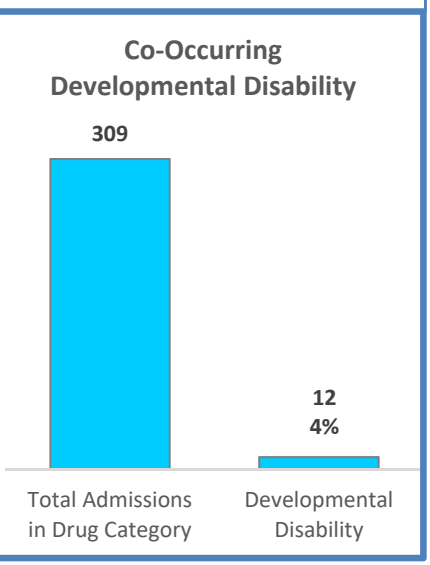








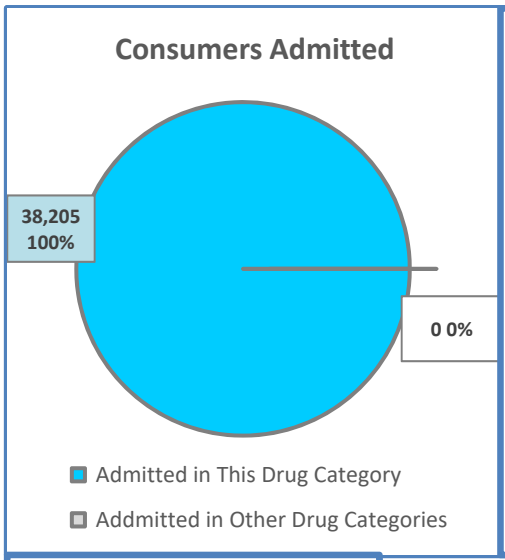


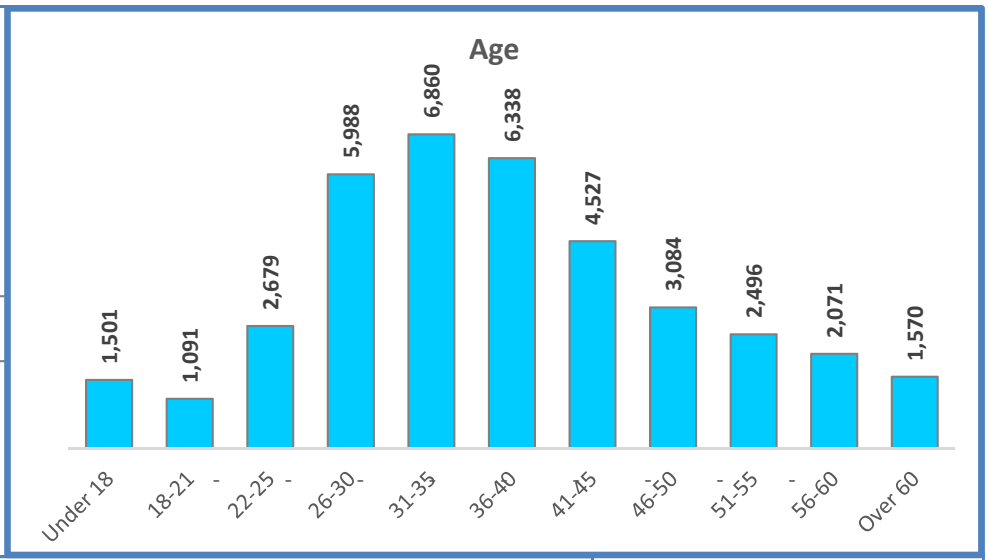


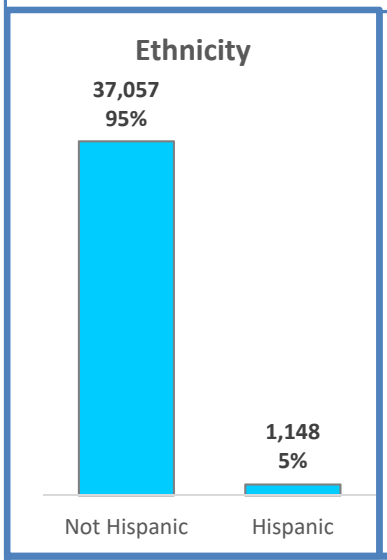
This profile summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 for substance use disorders. Consumers are counted in only one drug category based on their primary substance of concern when beginning their first episode of care. Some consumers also have a co-occurring mental disorder or developmental disability.

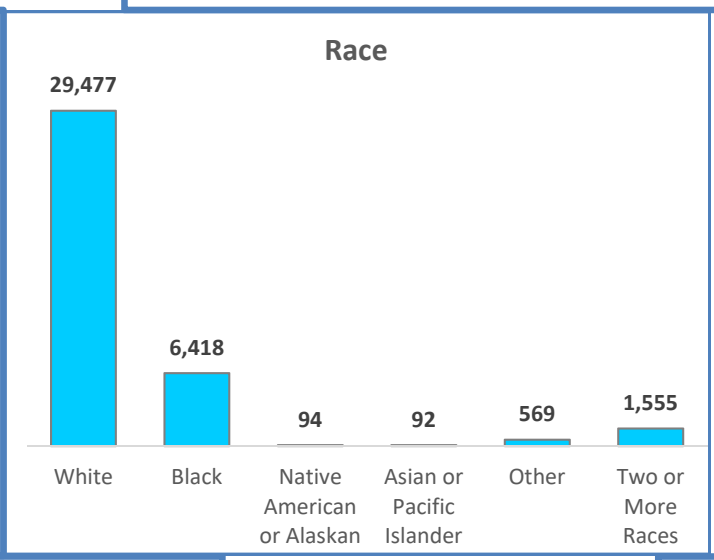
ALL SUBSTANCES (TOTAL)

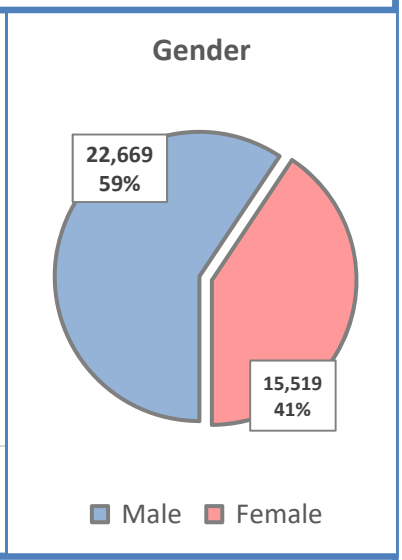
Statewide Substance Use Disorder Treatment Admissions in Fiscal Year 2022

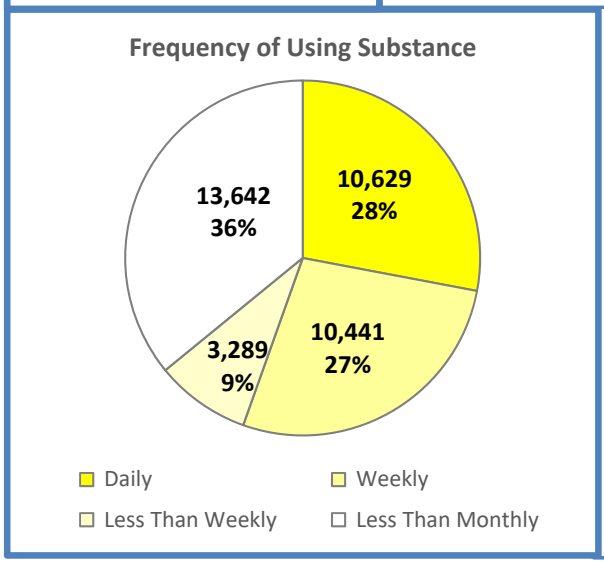


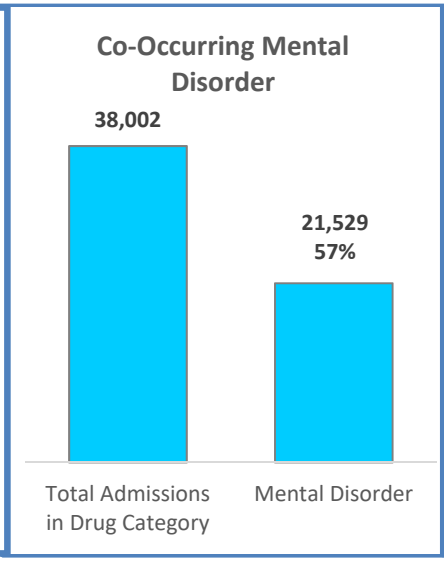


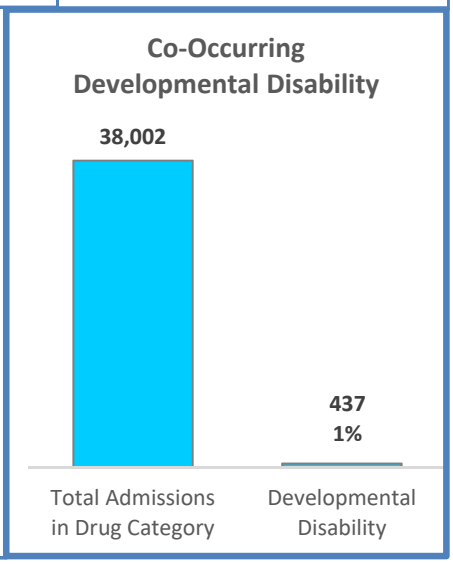












This profile summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 for substance use disorders. Consumers are counted in only one drug category based on their primary substance of concern when beginning their first episode of care. Some consumers also have a co-occurring mental disorder or developmental disability.

TREATMENT SERVICES FOR MENTAL DISORDERS

The data summarize individuals who received clinical services from Division of Behavioral Health (DBH) psychiatric programs. Individuals are counted only once based on their first treatment episode of the fiscal year. A zero (0) in a data cell indicates the count was fewer than five (5) and was suppressed to avoid disclosing identifying information.

CLAY COUNTY

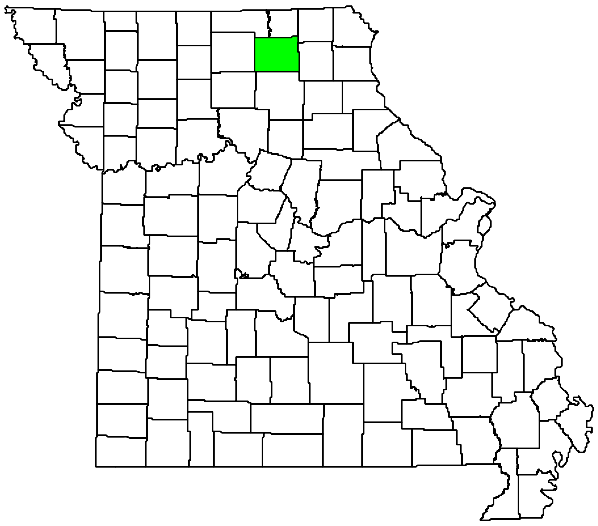
GEOGRAPHIC PROFILE OF MENTAL ILLNESS TREATMENT SERVICES



Individuals received assistance for the following types of disorders in DBH treatment programs. The number of diagnoses is larger than the number served because some individuals had more than one type of disorder.

Commitment Type Unknown	0	0	0

The data summarize individuals who received clinical services from Division of Behavioral Health (DBH) psychiatric programs. Individuals are counted only once based on their first treatment episode of the fiscal year. A zero (0) in a data cell indicates the count was fewer than five (5) and was suppressed to avoid disclosing identifying information.

HOWARD COUNTY

The data summarize individuals who received clinical services from Division of Behavioral Health (DBH) psychiatric programs. Individuals are counted only once based on their first treatment episode of the fiscal year. A zero (0) in a data cell indicates the count was fewer than five (5) and was suppressed to avoid disclosing identifying information.

LIVINGSTON COUNTY

The data summarize individuals who received clinical services from Division of Behavioral Health (DBH) psychiatric programs. Individuals are counted only once based on their first treatment episode of the fiscal year. A zero (0) in a data cell indicates the count was fewer than five (5) and was suppressed to avoid disclosing identifying information.

PETTIS COUNTY

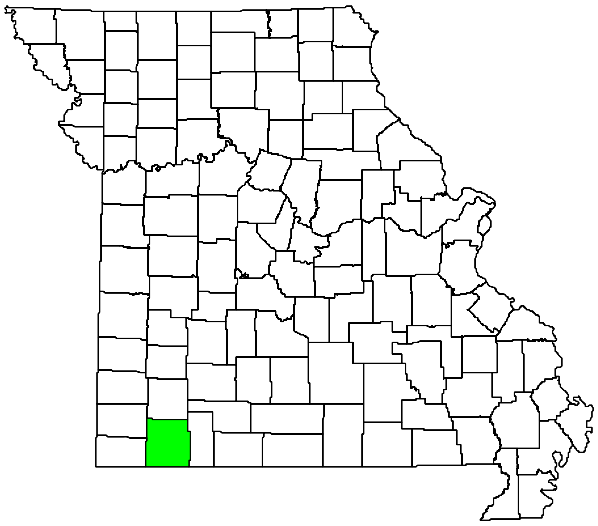
GEOGRAPHIC PROFILE OF MENTAL ILLNESS TREATMENT SERVICES



Individuals received assistance for the following types of disorders in DBH treatment programs. The number of diagnoses is larger than the number served because some individuals had more than one type of disorder.

The data summarize individuals who received clinical services from Division of Behavioral Health (DBH) psychiatric programs. Individuals are counted only once based on their first treatment episode of the fiscal year. A zero (0) in a data cell indicates the count was fewer than five (5) and was suppressed to avoid disclosing identifying information.

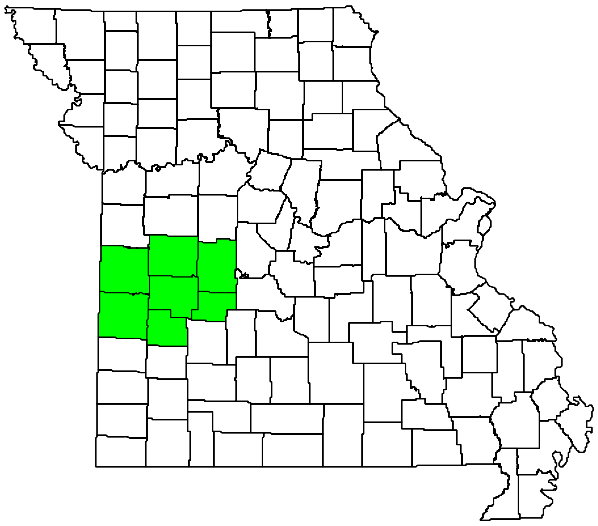
MENTAL HEALTH SERVICE AREA 8B

GEOGRAPHIC PROFILE OF MENTAL ILLNESS TREATMENT SERVICES



Individuals received assistance for the following types of disorders in DBH treatment programs. The number of diagnoses is larger than the number served because some individuals had more than one type of disorder.

The data summarize individuals who received clinical services from Division of Behavioral Health (DBH) psychiatric programs. Individuals are counted only once based on their first treatment episode of the fiscal year. A zero (0) in a data cell indicates the count was fewer than five (5) and was suppressed to avoid disclosing identifying information.

The data summarize individuals who received clinical services from Division of Behavioral Health (DBH) psychiatric programs. Individuals are counted only once based on their first treatment episode of the fiscal year. A zero (0) in a data cell indicates the count was fewer than five (5) and was suppressed to avoid disclosing identifying information.

The data summarize individuals who received clinical services from Division of Behavioral Health (DBH) psychiatric programs. Individuals are counted only once based on their first treatment episode of the fiscal year. A zero (0) in a data cell indicates the count was fewer than five (5) and was suppressed to avoid disclosing identifying information.

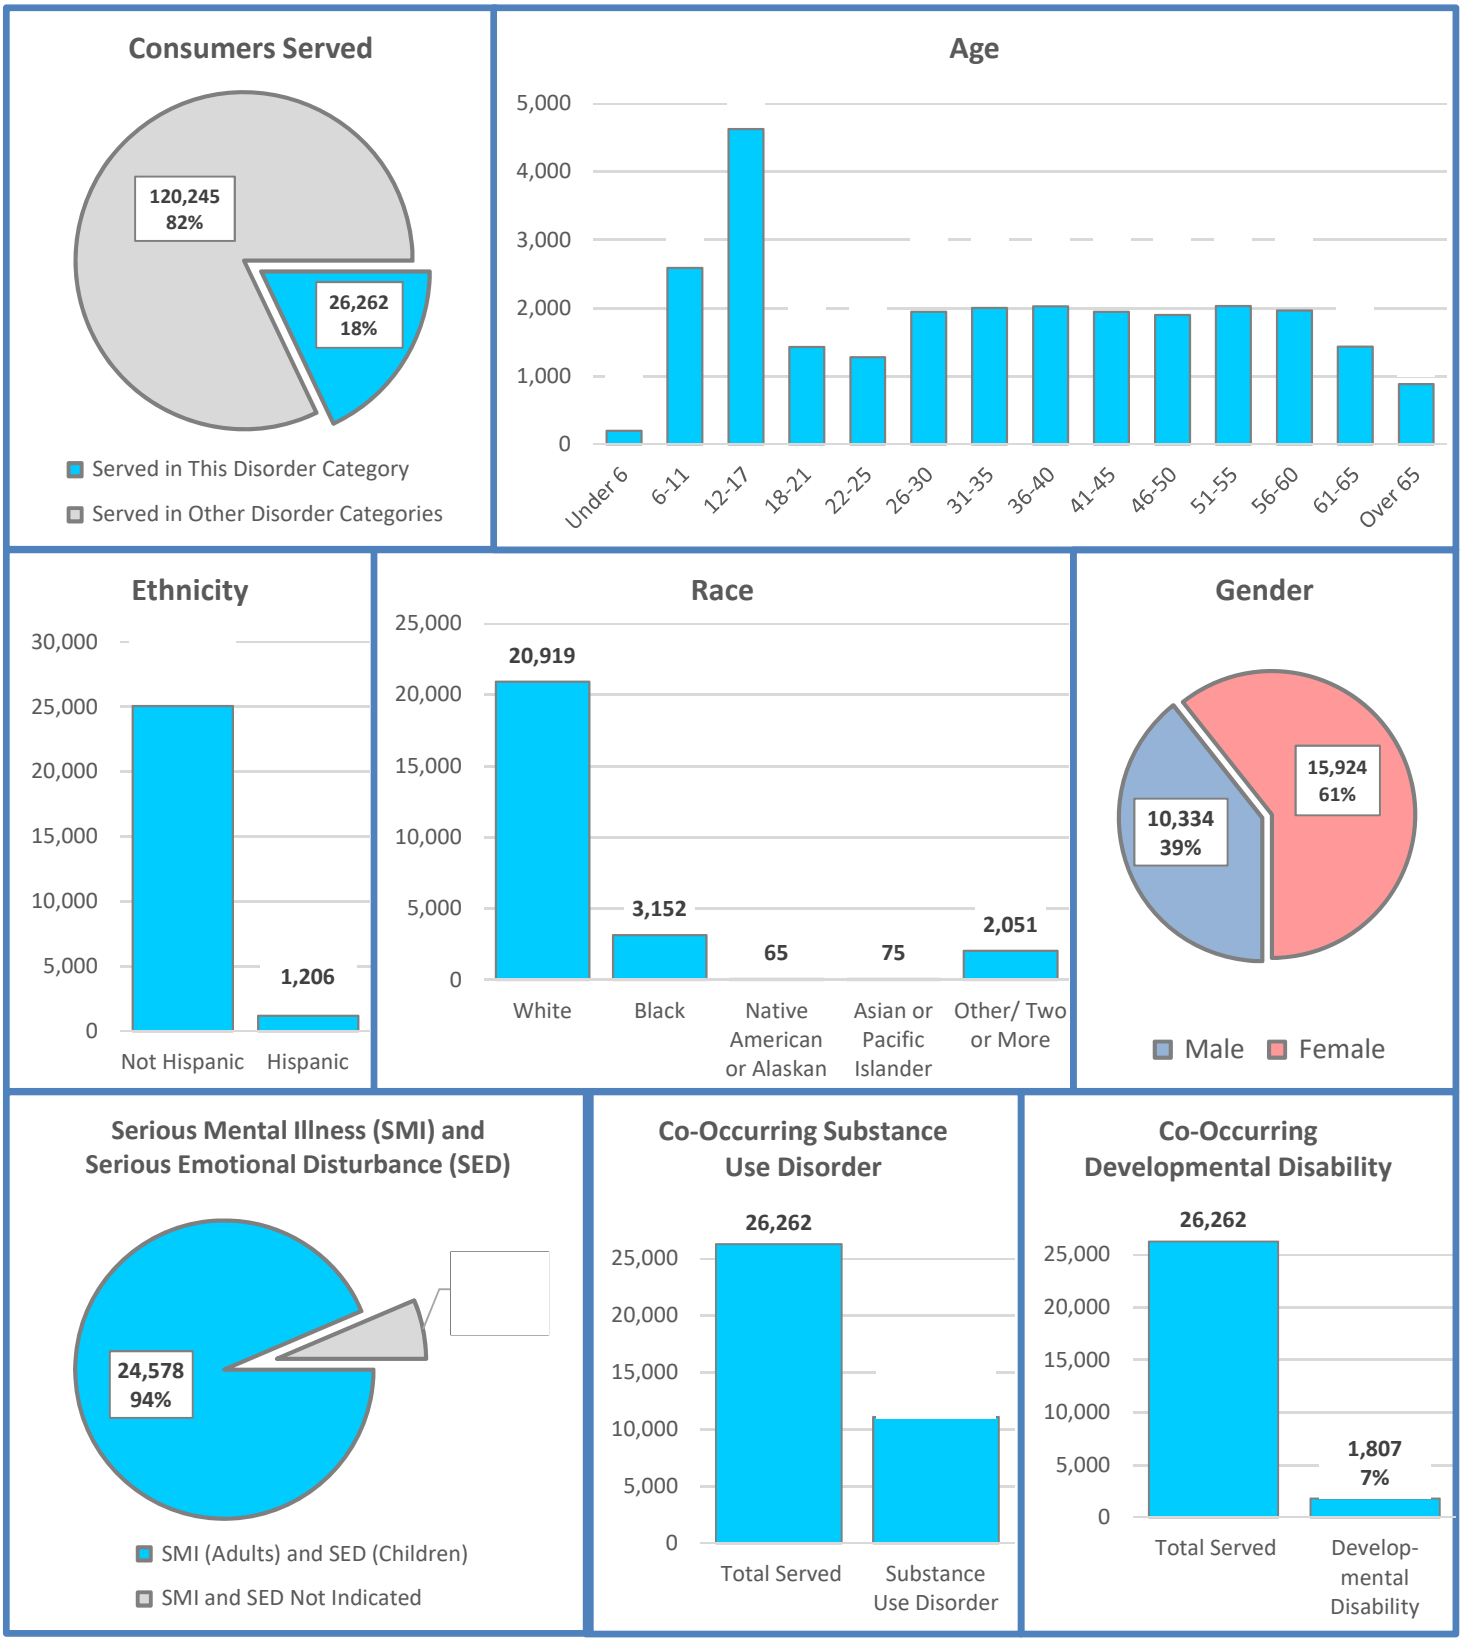
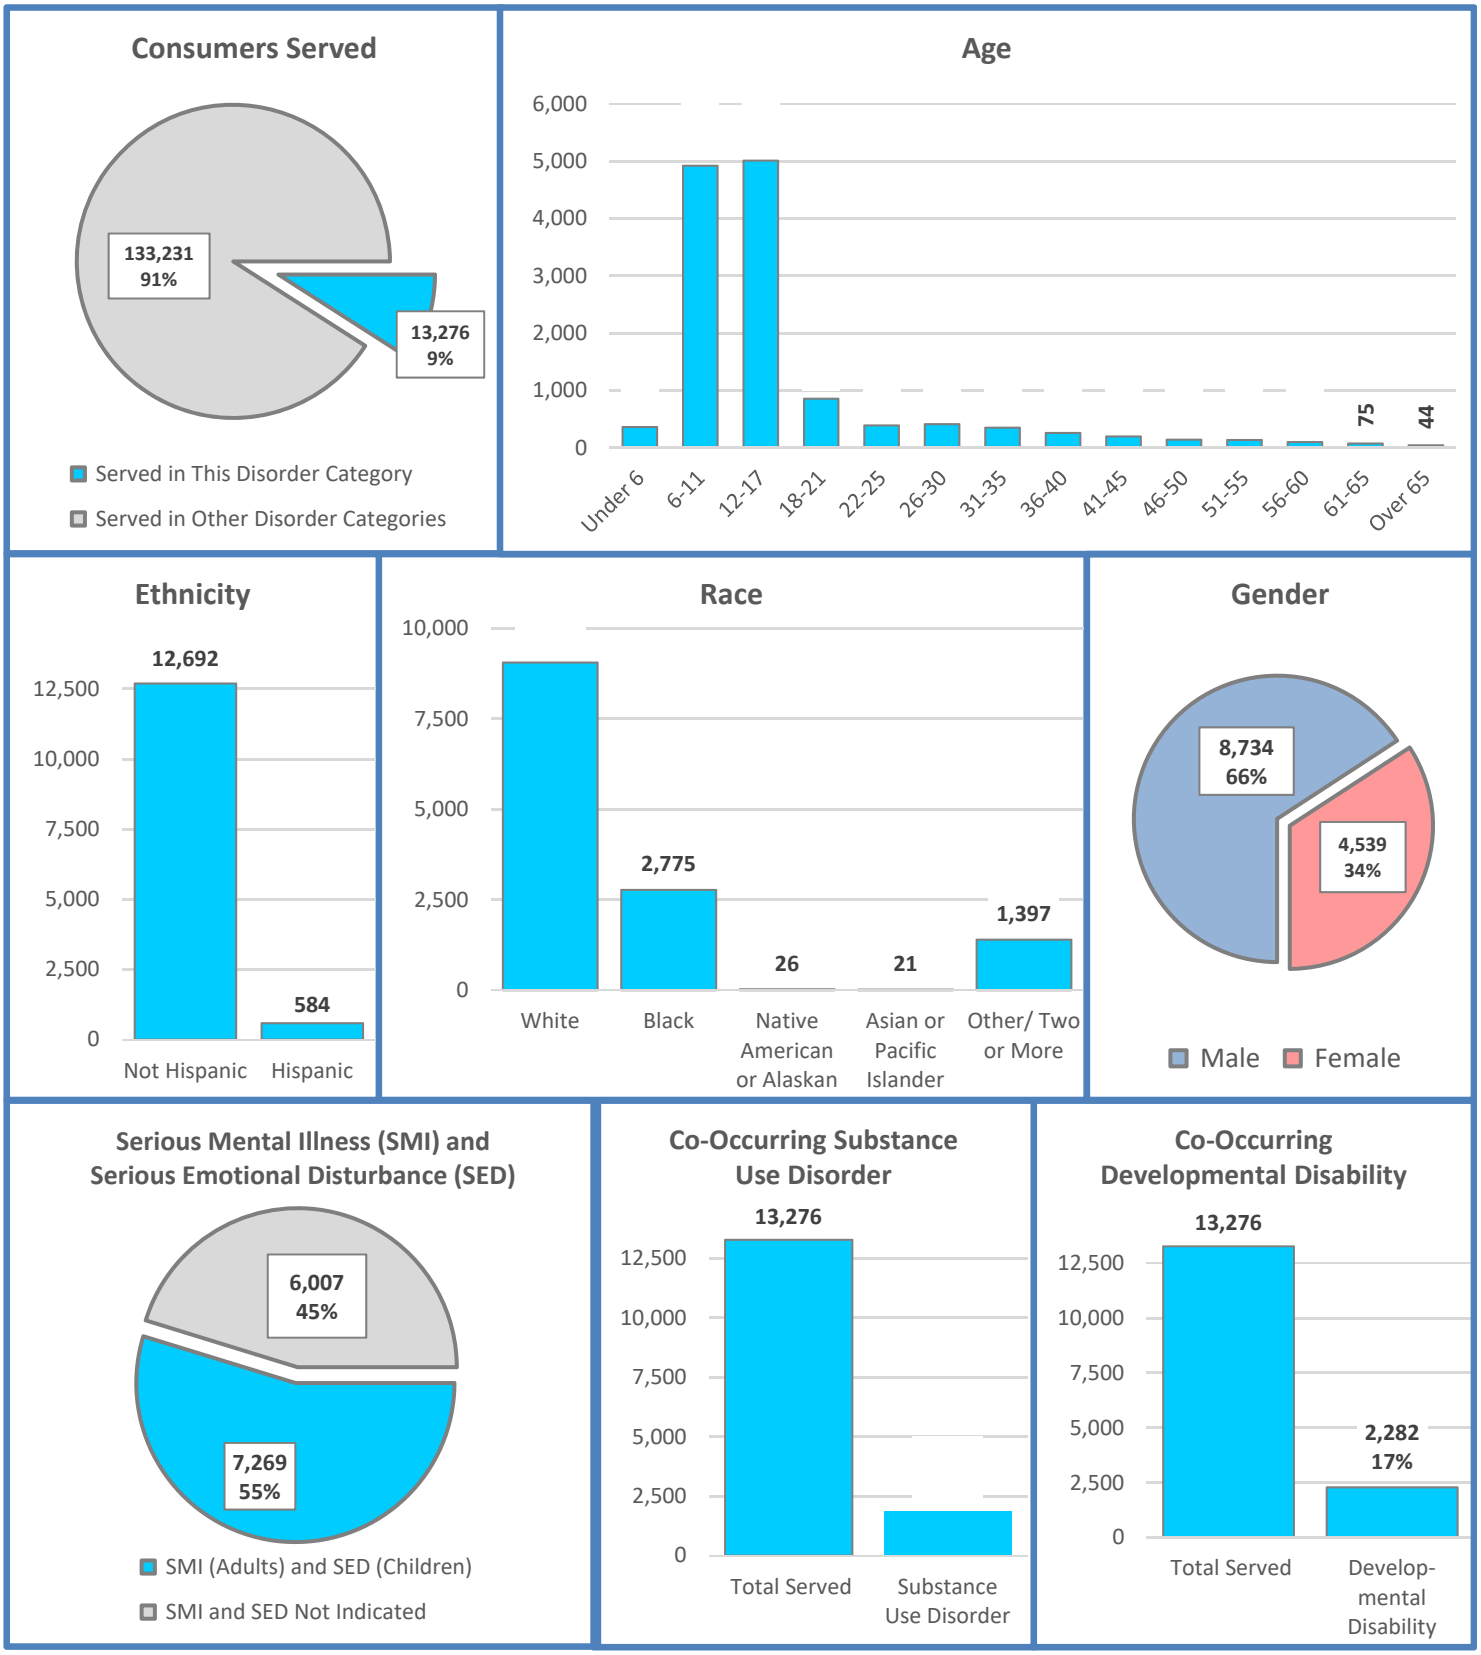
ANXIETY, FEAR, AND PHOBIA DISORDERS



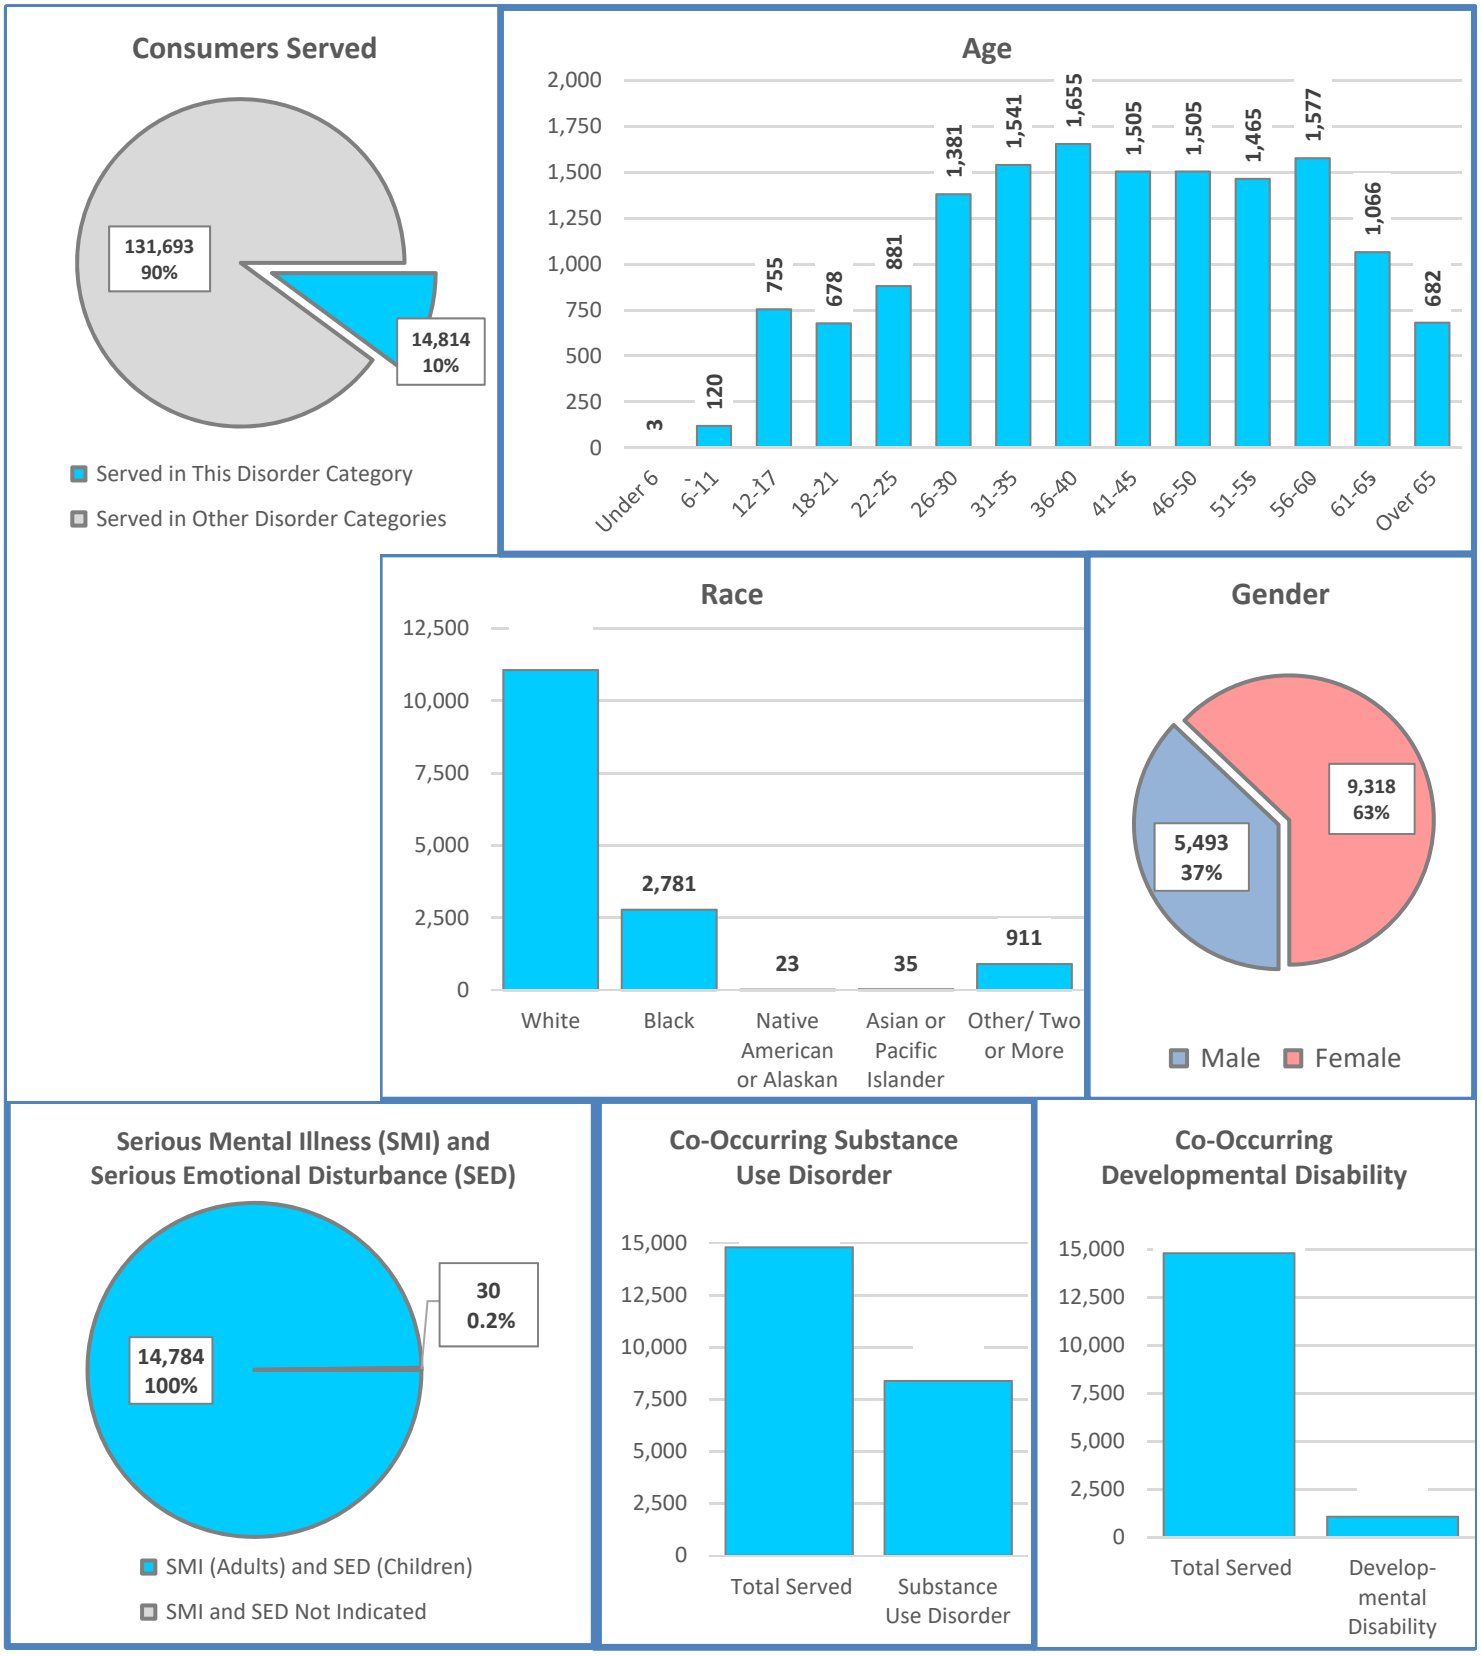
This profile summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 who were diagnosed with a disorder in this category. Consumers with more than one type of disorder are included on each applicable profile page. Some also have a co-occurring substance use disorder or developmental disability.

ATTENTION DEFICIT DISORDERS



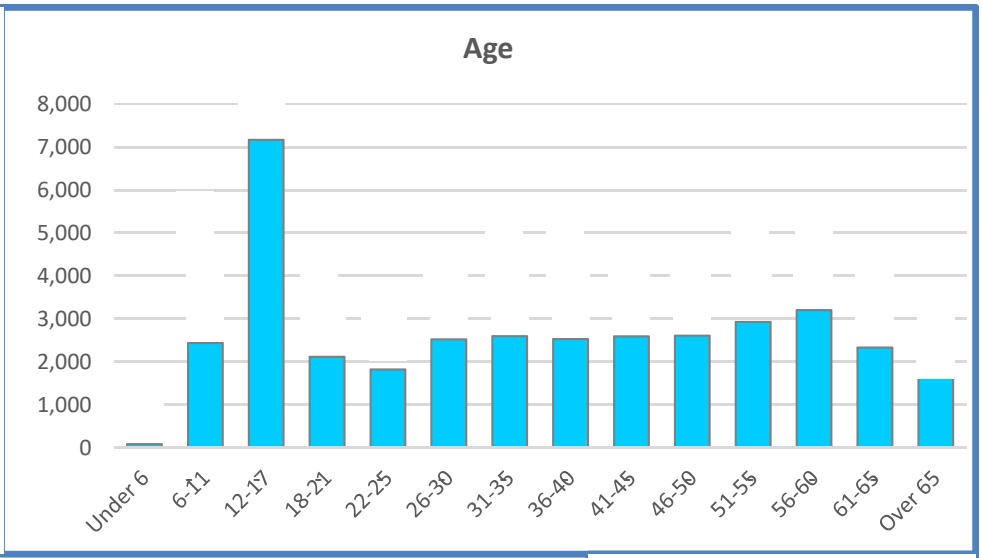
This page summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 who were diagnosed with a Anxiety, Fear, or Phobia disorder. Consumers with more than one disorder are included on each applicable profile page. Some also have a co-occurring substance use disorder or developmental disability.

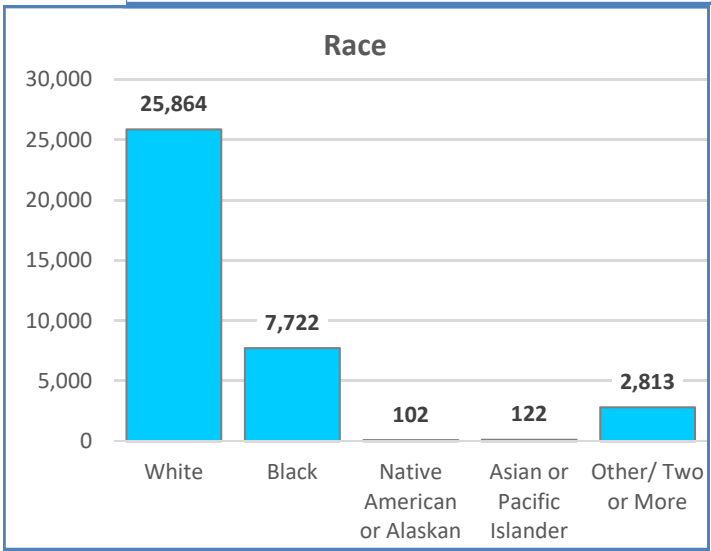
BIPOLAR MOOD DISORDERS

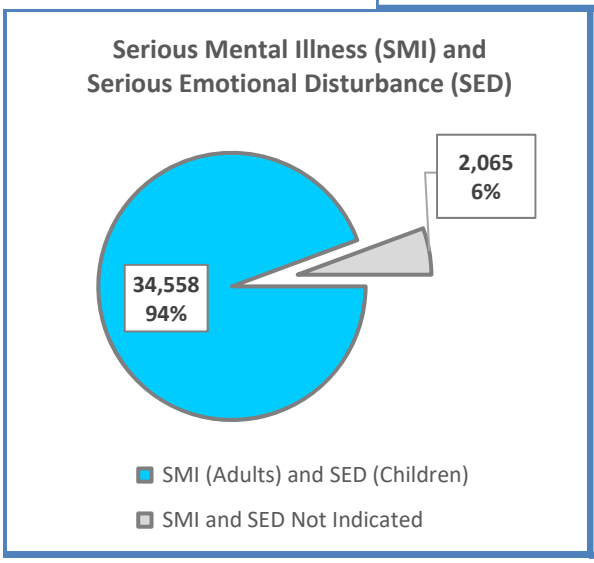


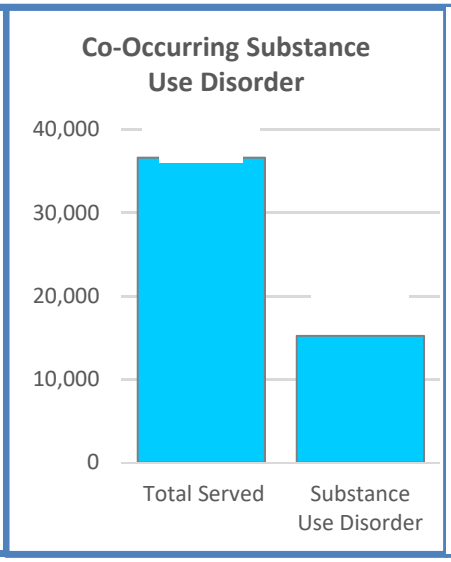
This page summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 who were diagnosed with a Anxiety, Fear, or Phobia disorder. Consumers with more than one disorder are included on each applicable profile page. Some also have a co-occurring substance use disorder or developmental disability.

DEPRESSIVE MOOD DISORDERS



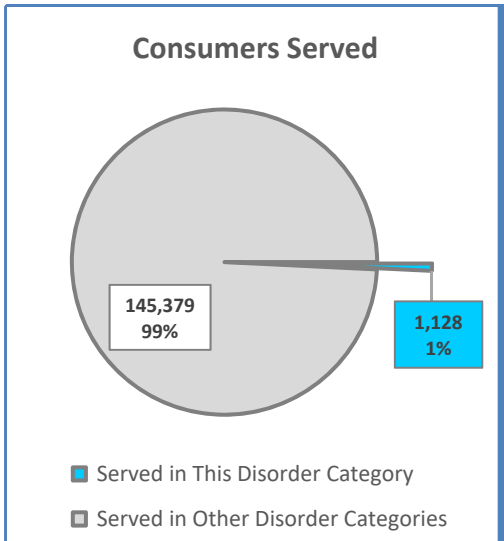


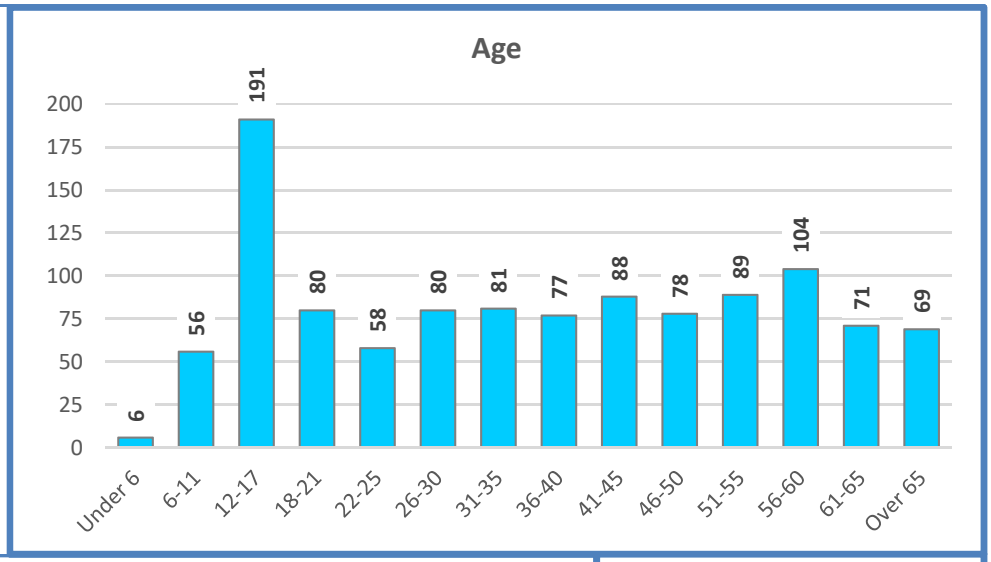


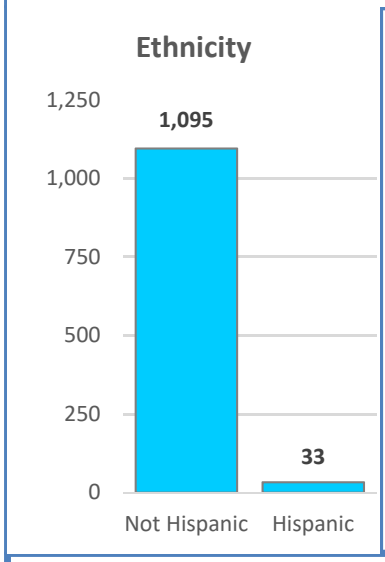


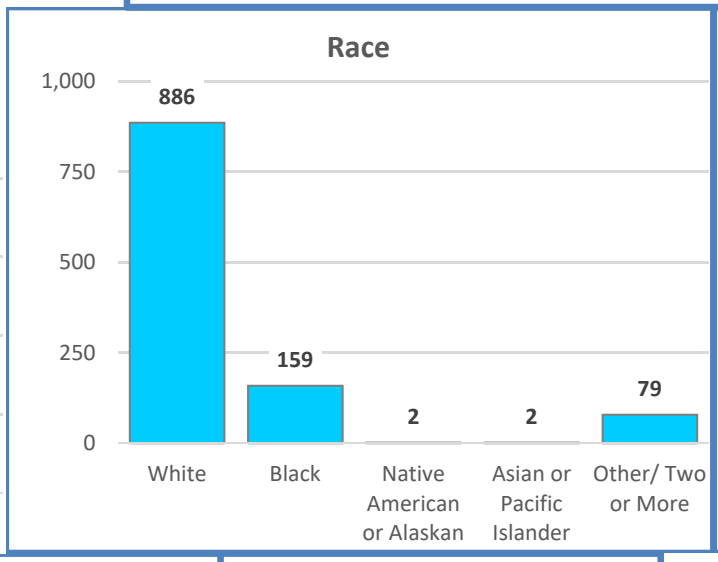
This page summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 who were diagnosed with a Anxiety, Fear, or Phobia disorder. Consumers with more than one disorder are included on each applicable profile page. Some also have a co-occurring substance use disorder or developmental disability.

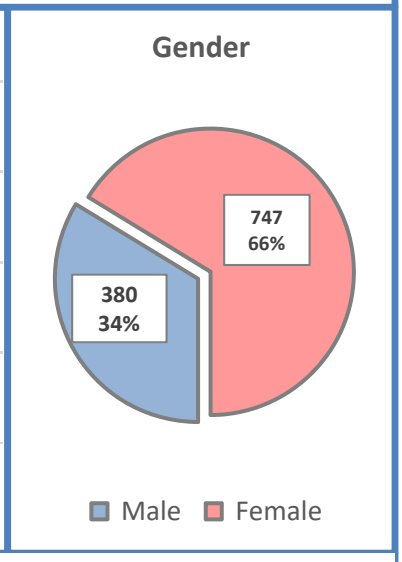
EATING AND SLEEPING DISORDERS

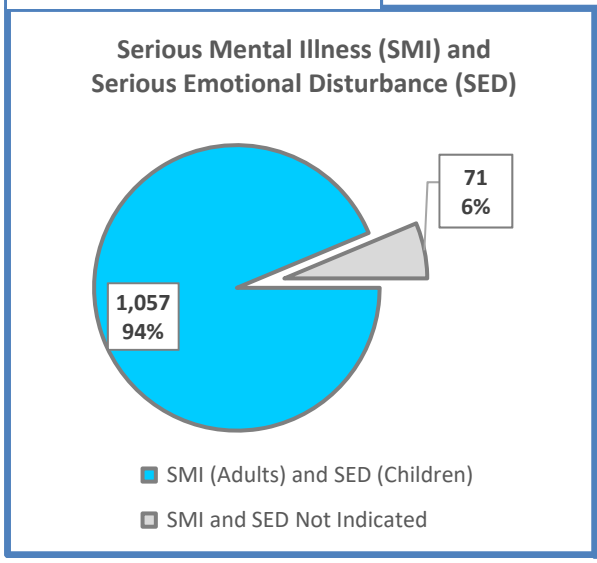


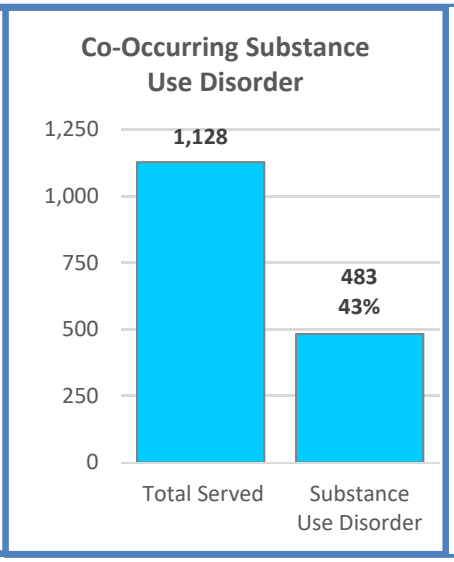


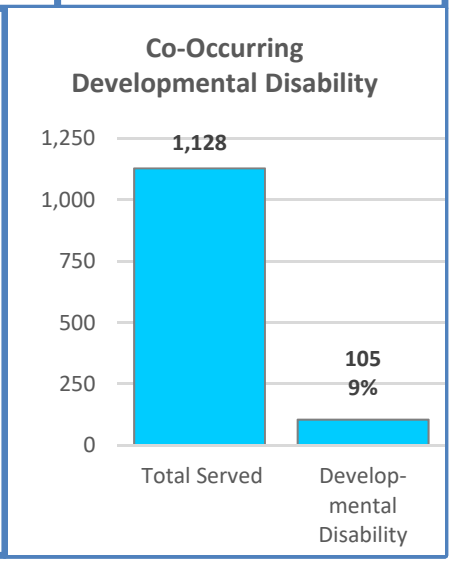






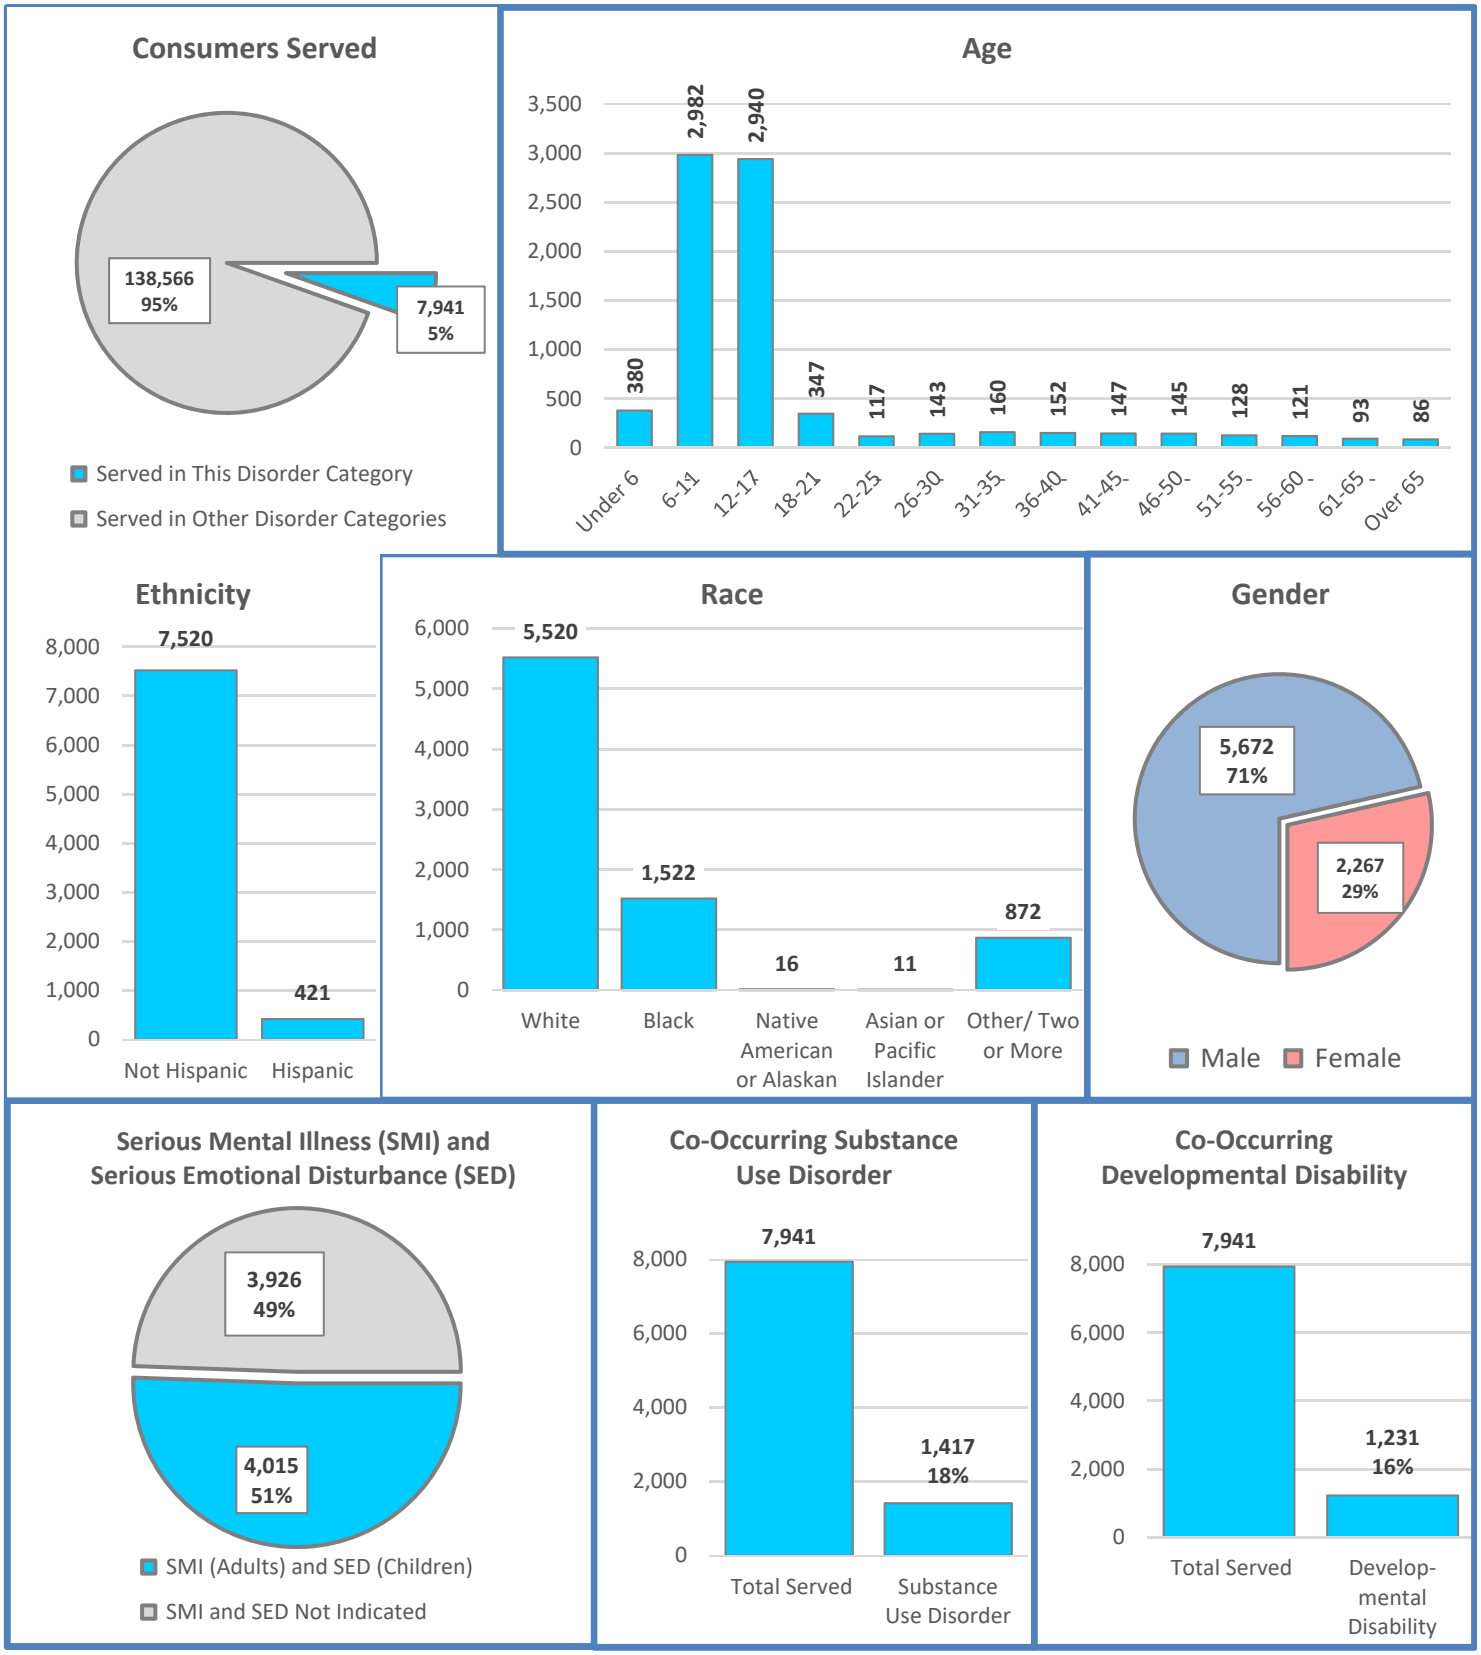






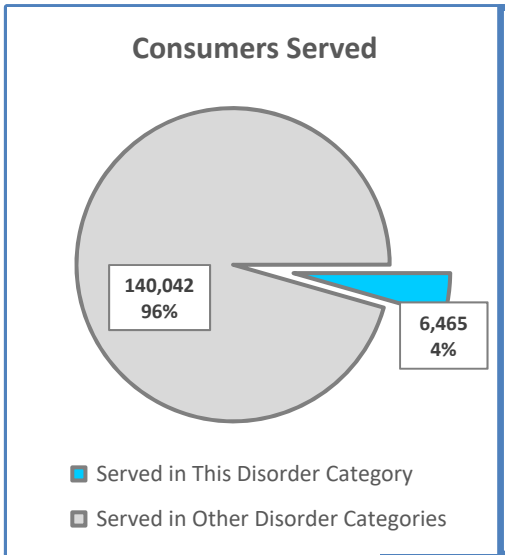
This page summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 who were diagnosed with a Anxiety, Fear, or Phobia disorder. Consumers with more than one disorder are included on each applicable profile page. Some also have a co-occurring substance use disorder or developmental disability.

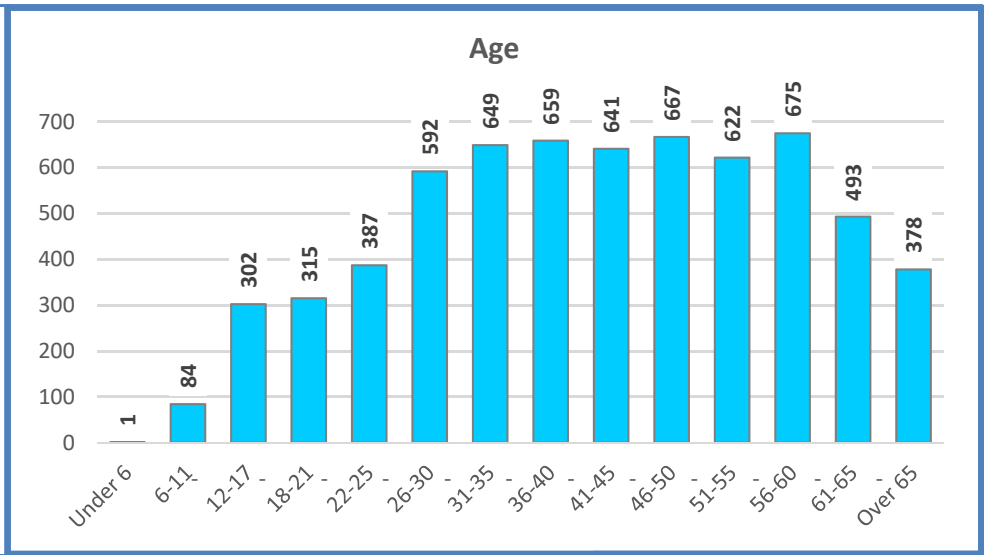
IMPULSE CONTROL AND CONDUCT DISORDERS

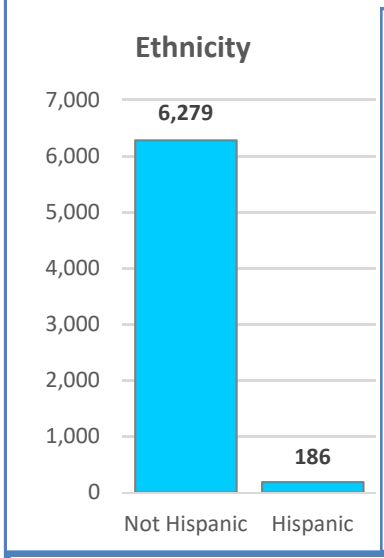


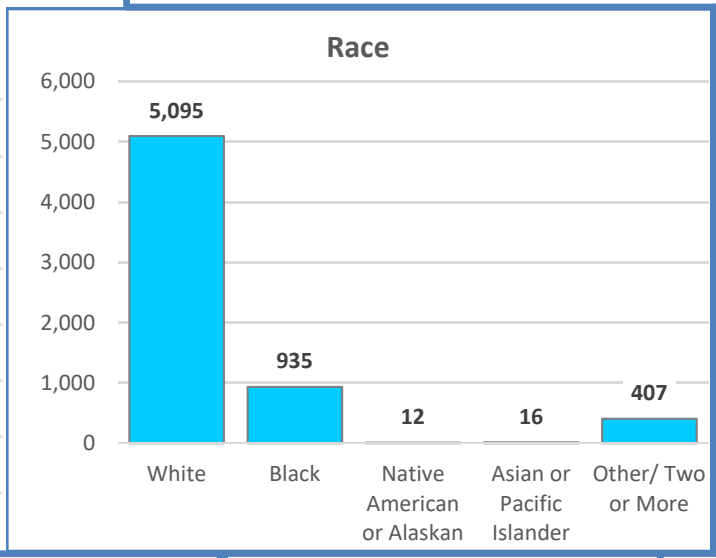
This page summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 who were diagnosed with a Anxiety, Fear, or Phobia disorder. Consumers with more than one disorder are included on each applicable profile page. Some also have a co-occurring substance use disorder or developmental disability.

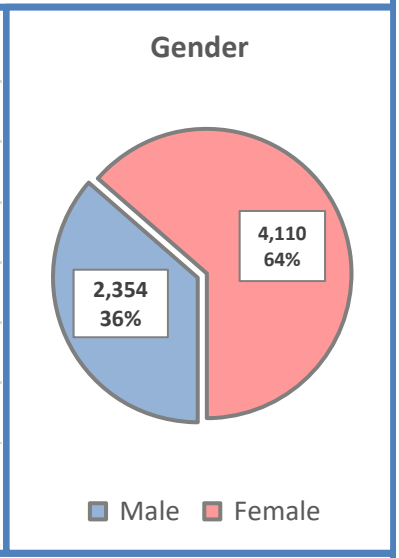
OBSESSIVE-COMPULSIVE AND PERSONALITY DISORDERS

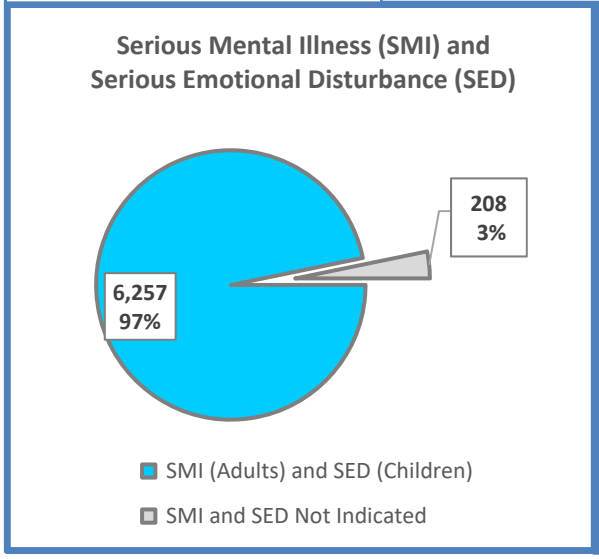


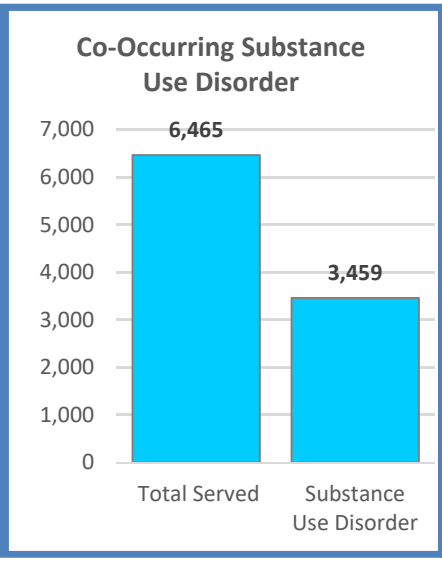


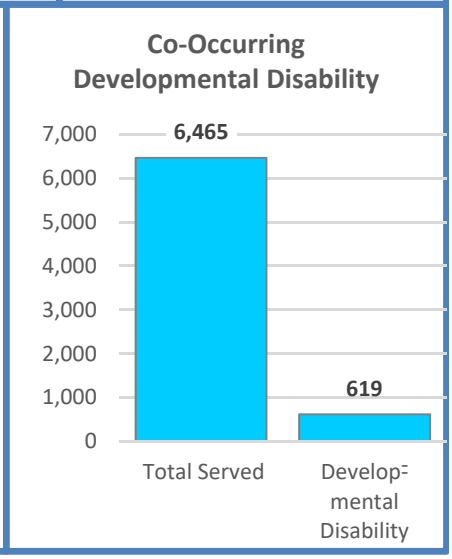






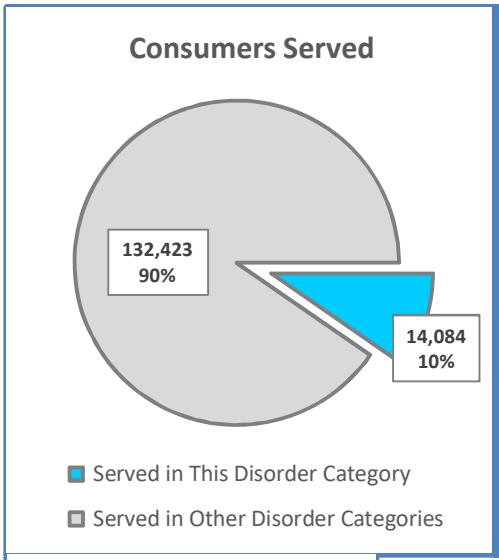


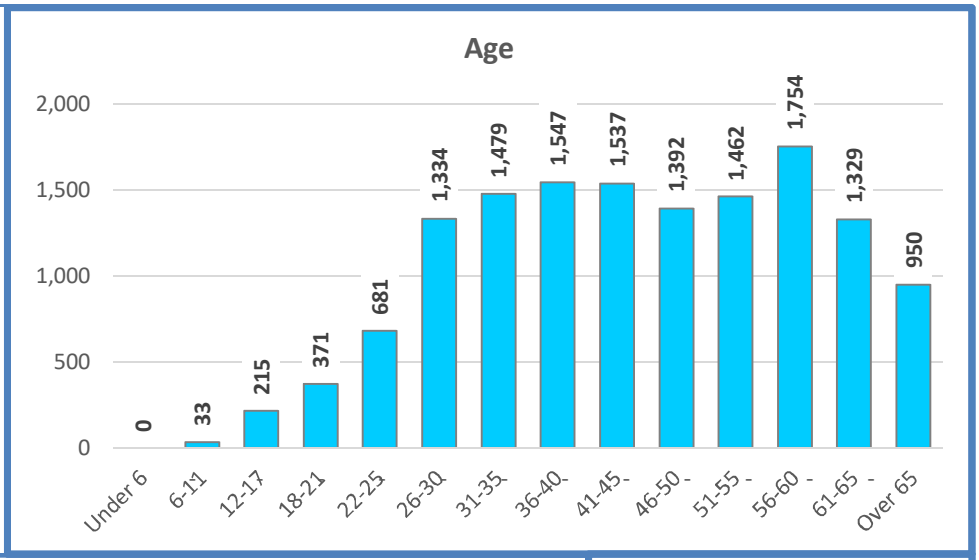


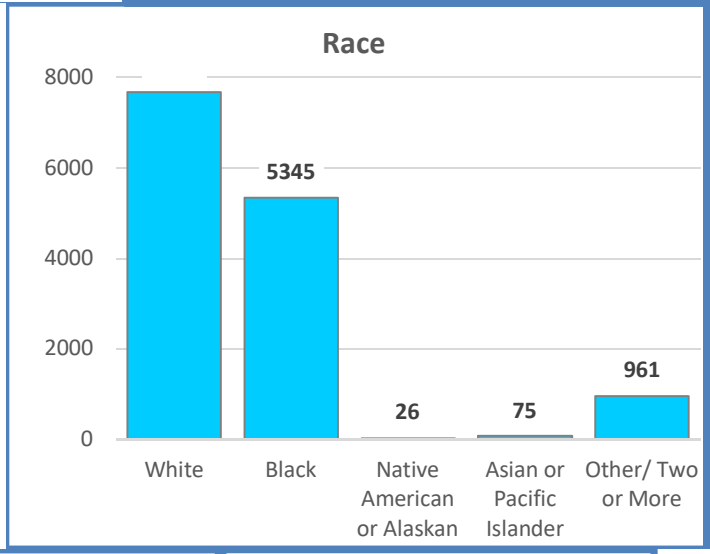


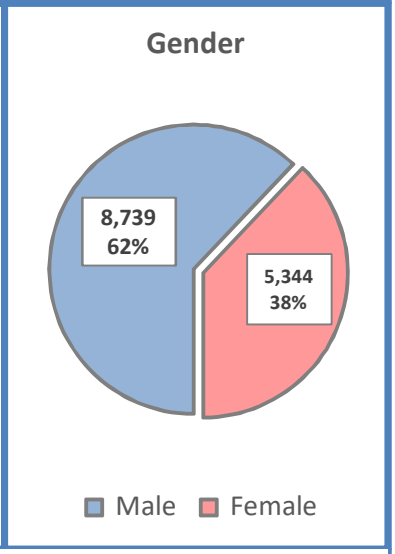
This profile summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 who were diagnosed with a disorder in this category. Consumers with more than one type of disorder are included on each applicable profile page. Some also have a co-occurring substance use disorder or developmental disability.

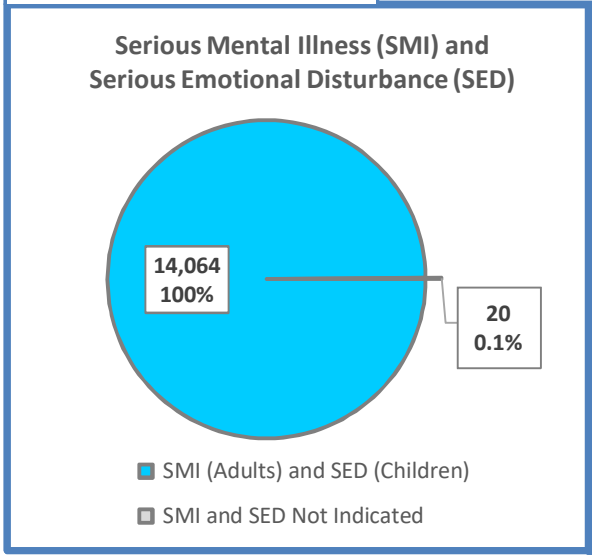
SCHIZOPHRENIA AND PSYCHOTIC DISORDERS

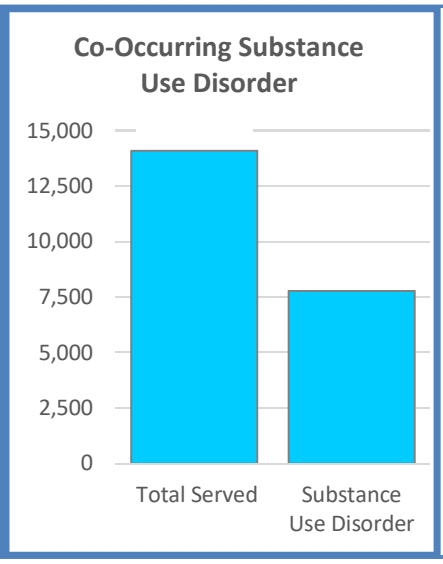


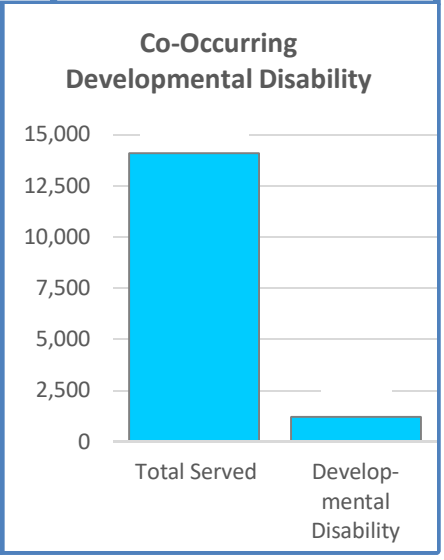






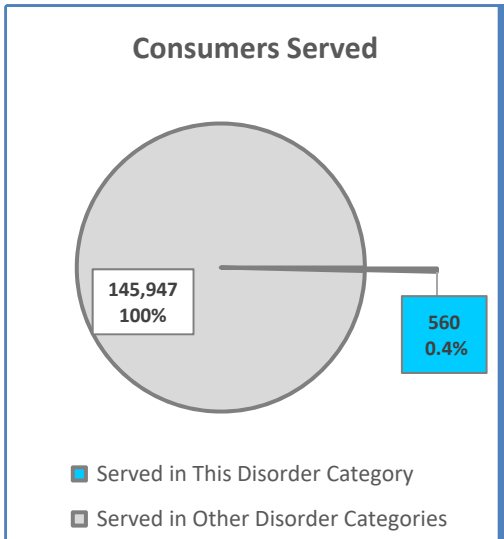


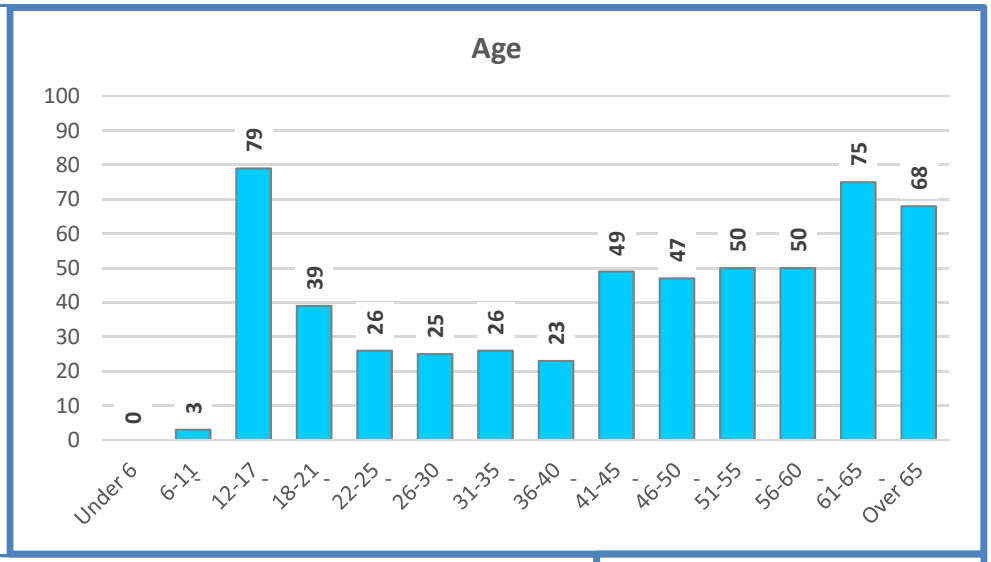


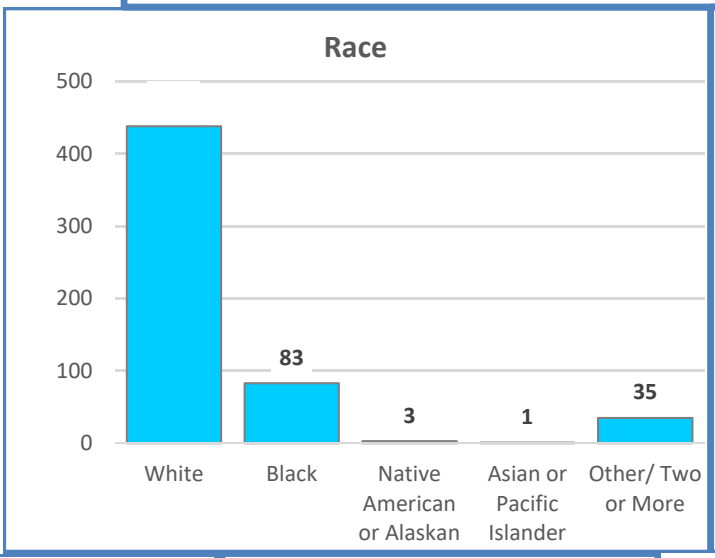


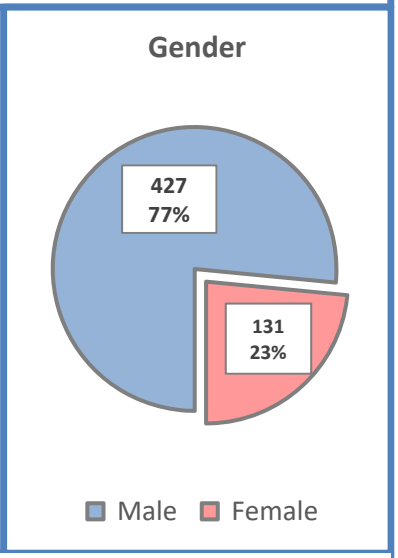
This profile summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 who were diagnosed with a disorder in this category. Consumers with more than one type of disorder are included on each applicable profile page. Some also have a co-occurring substance use disorder or developmental disability.

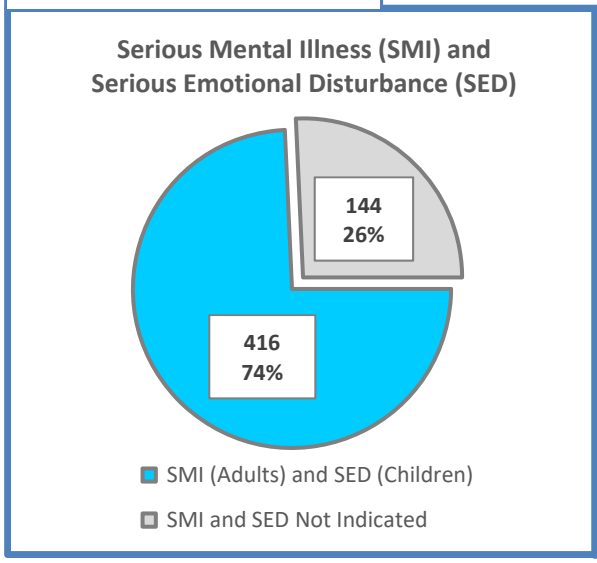
SEXUAL DISORDERS

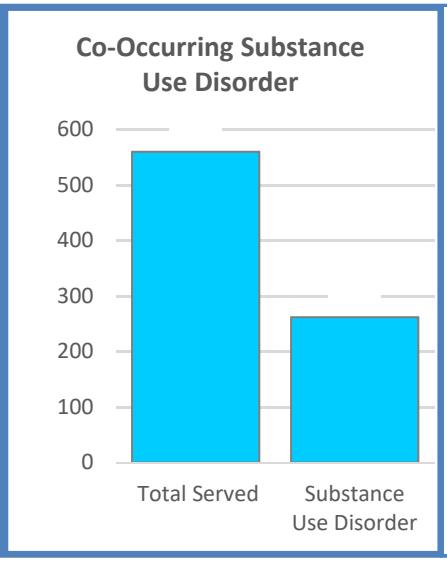


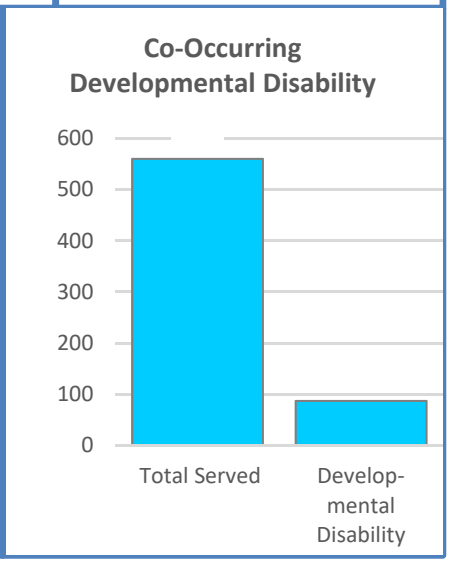






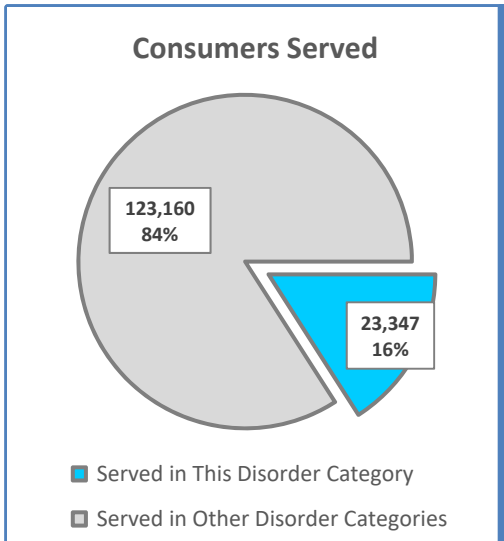


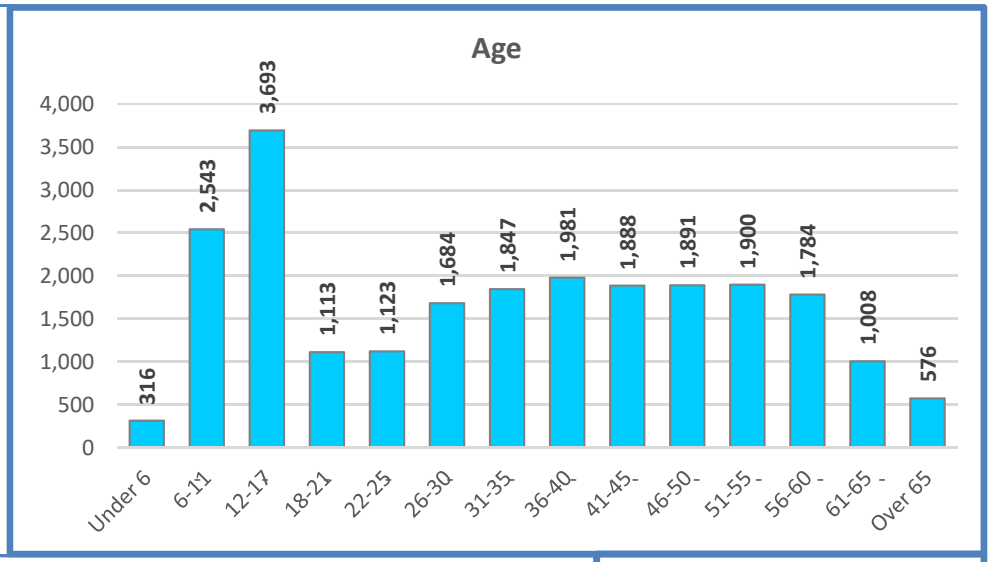


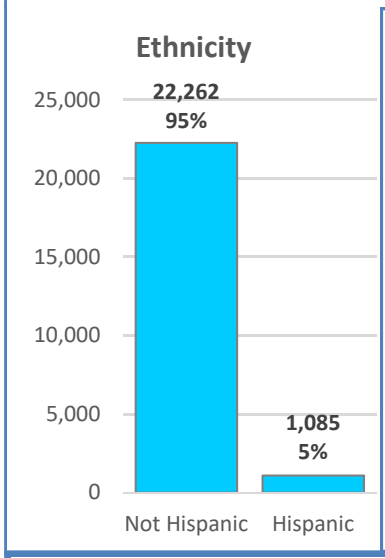


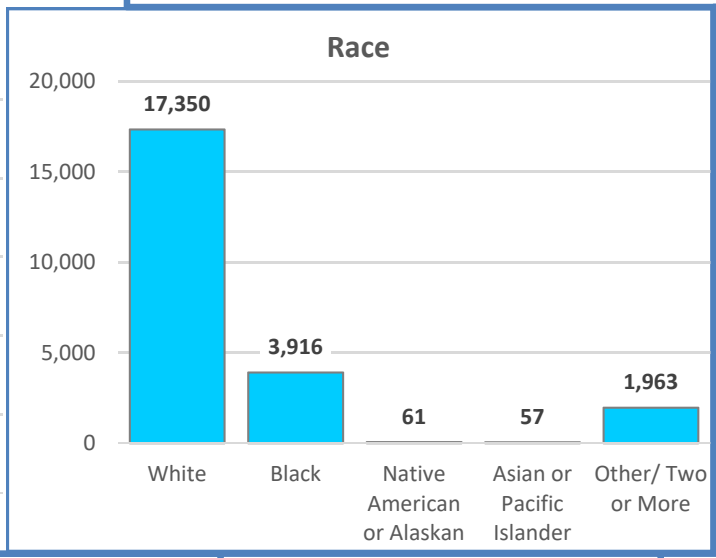
This page summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 who were diagnosed with a Anxiety, Fear, or Phobia disorder. Consumers with more than one disorder are included on each applicable profile page. Some also have a co-occurring substance use disorder or developmental disability.

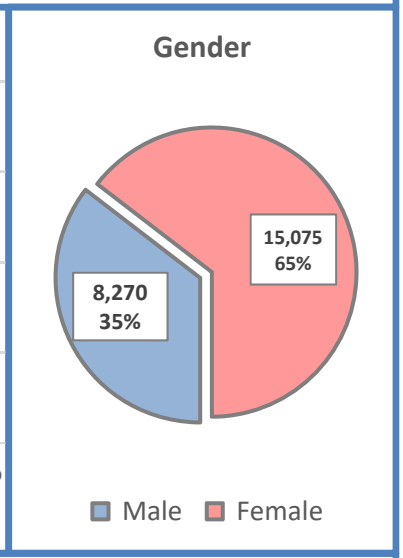
TRAUMA AND STRESS RELATED DISORDERS

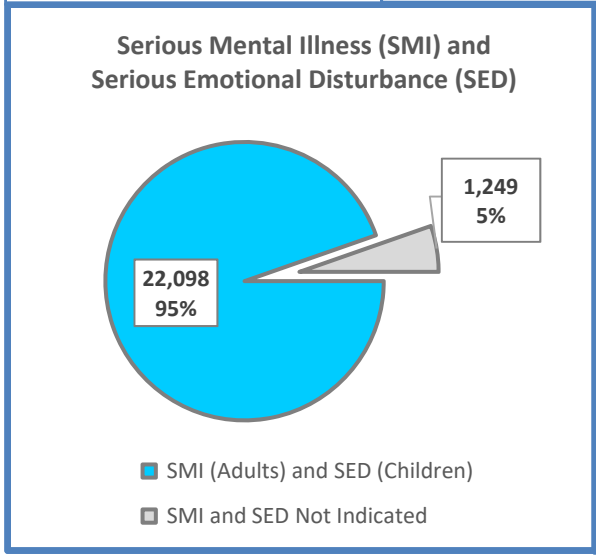


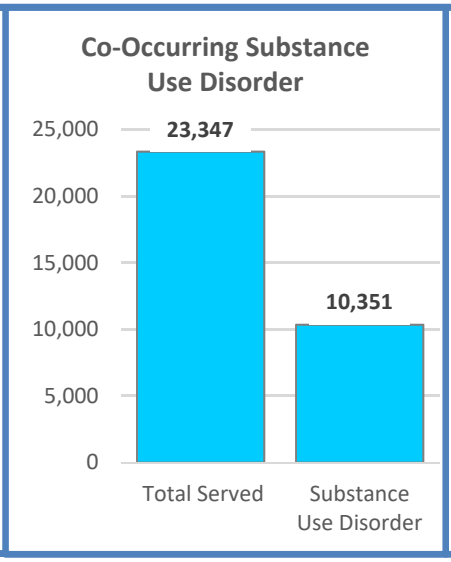


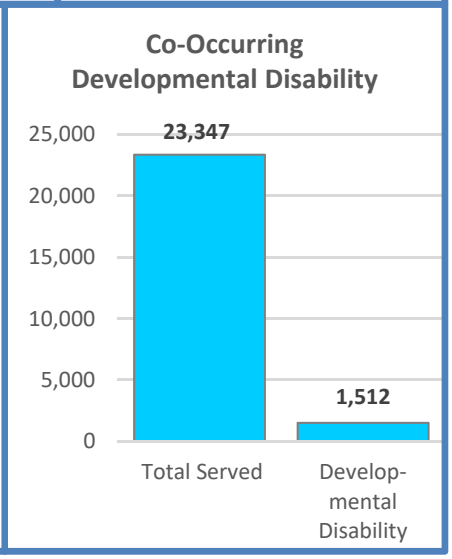












This profile summarizes consumers receiving Missouri Department of Mental Health services in fiscal year 2022 who were diagnosed with a disorder in this category. Consumers with more than one type of disorder are included on each applicable profile page. Some also have a co-occurring substance use disorder or developmental disability.

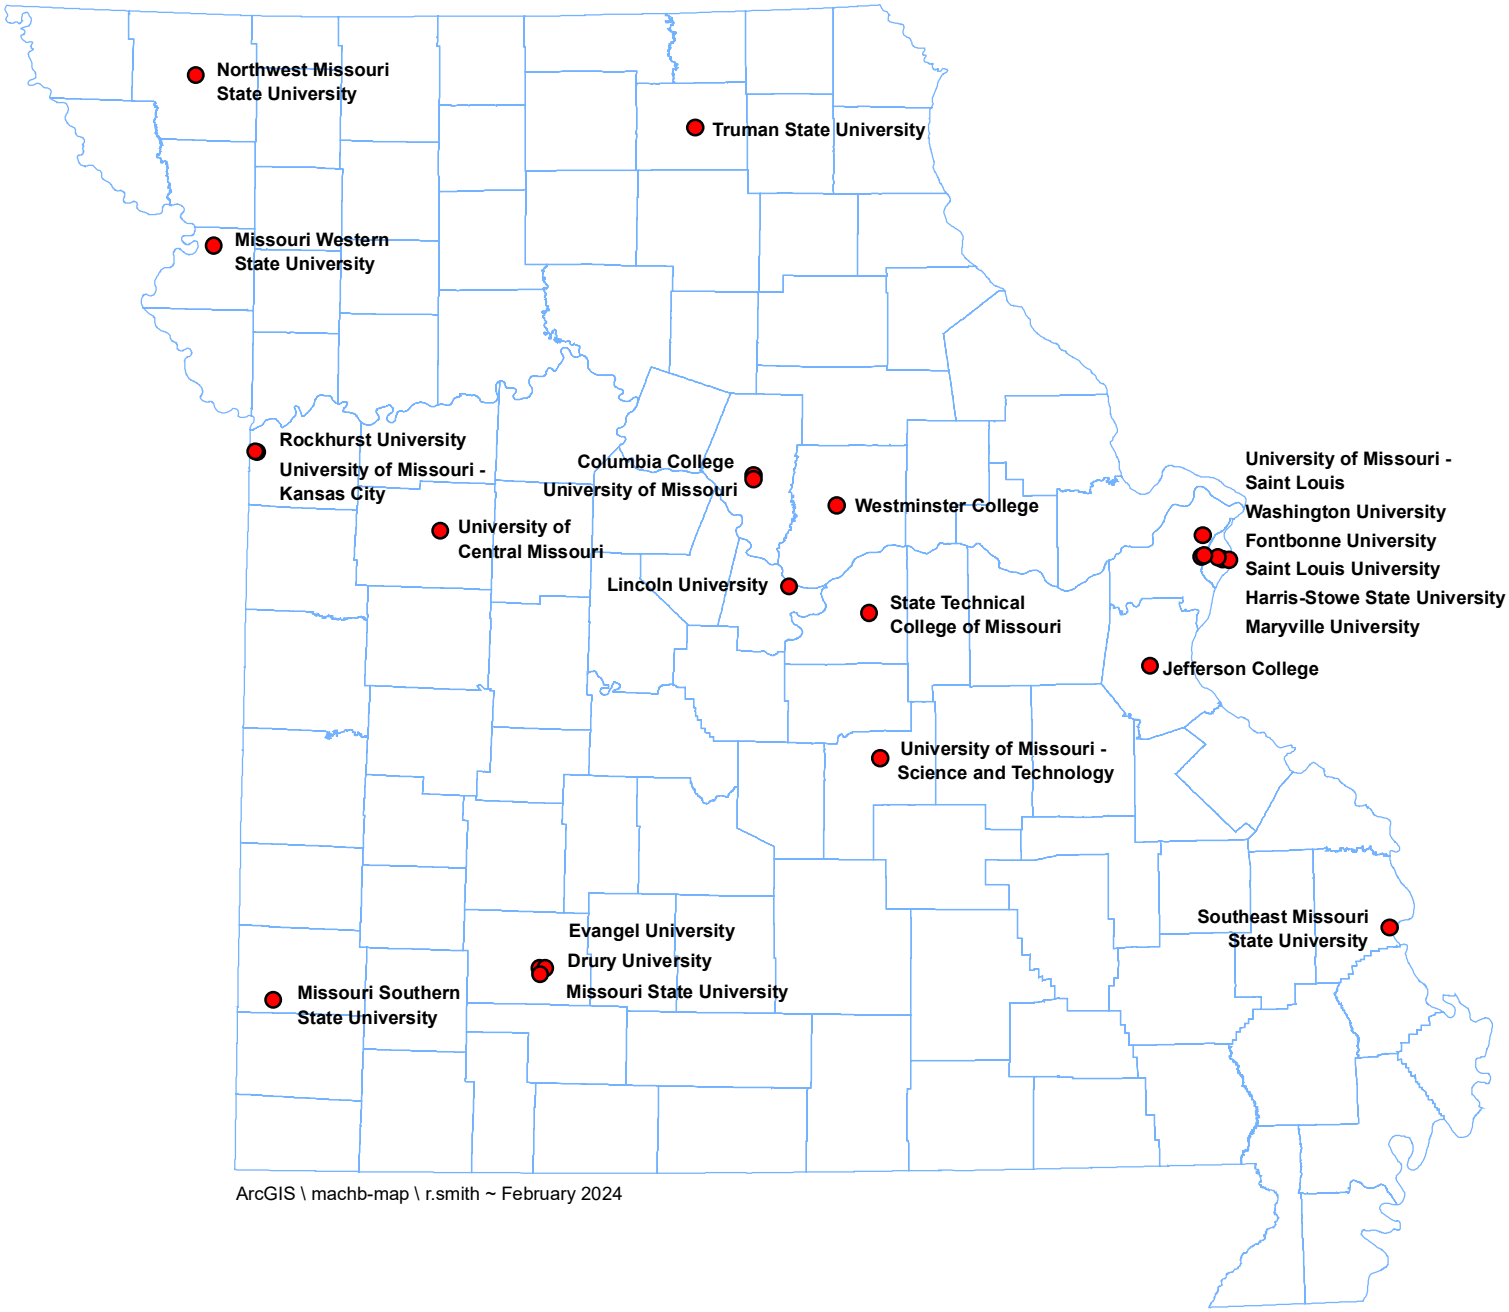
MISSOURI ASSESSMENT OF COLLEGE HEALTH BEHAVIORS

UNIVERSITIES AND COLLEGES PARTICIPATING IN THE 2023 MACHB ANNUAL SURVEY



The Missouri Assessment of College Health Behaviors is administered annually to students enrolled in universities and colleges that are members of the Missouri Partners in Prevention (PIP) consortium. Campuses that are not formal members of the PIP consortium also administer the survey, but their data are not reflected in the survey analysis.

More information on the MACHB Survey can be found at: https://www.mopip.org/docs/briefs/PIP_Fact_MACHB_2024.pdf.
